#### **⚠ WARNING**

This service information is designed for experienced repair technicians only and is not designed for use by the general public. It does not contain warnings or cautions to advise non-technical individuals of potential dangers in attempting to service a product. Products powered by electricity should be serviced or repaired only by experienced professional technicians. Any attempt to service or repair the product or products dealt with in this service information by anyone else could result in serious injury or death.

## **Panasonic**

### 1. SAFETY PRECAUTIONS

**GENERAL GUIDELINES** 

#### 1. IMPORTANT SAFETY NOTICE

There are special components used in this equipment which are important for safety. These parts are marked by △ in the Schematic Diagrams, Circuit Board Layout, Exploded Views and Replacement Parts List. It is essential that these critical parts should be replaced with manufacturer's specified parts to prevent X-RADIATION, shock, fire, or other hazards. Do not modify the original design without permission of manufacturer.

- 2. An Isolation Transformer should always be used during the servicing of AC Adaptor whose chassis is not isolated from the AC power line. Use a transformer of adequate power rating as this protects the technician from accidents resulting in personal injury from electrical shocks. It will also protect AC Adaptor from being damaged by accidental shorting that may occur during servicing.
- 3. When servicing, observe the original lead dress. If a short circuit is found, replace all parts which have been overheated or damaged by the short circuit.
- 4. After servicing, see to it that all the protective devices such as insulation barriers, insulation papers shields are properly installed.
- 5. After servicing, make the following leakage current checks to prevent the customer from being exposed to shock hazards.

LEAKAGE CURRENT COLD CHECK

- 1. Unplug the AC cord and connect a jumper between the two prongs on the plug.
- 2. Measure the resistance value, with an ohmmeter, between the jumpered AC plug and each exposed metallic cabinet part on the equipment such as screwheads, connectors, control shafts, etc.

When the exposed metallic part has a return path to the chassis, the reading should be between 1 M  $\Omega$  and 5.2 M  $\Omega$ . When the exposed metal does not have a return path to the chassis, the reading must be infinity.

LEAKAGE CURRENT HOT CHECK (See Figure 1.)

- 1. Plug the AC cord directly into the AC outlet. Do not use an isolation transformer for this check.
- 2. Connect a 1.5 k  $\Omega$  , 10 W resistor, in parallel with a 0.15  $\mu$  F capacitor, between each exposed metallic part on the set and a good earth ground, as shown in Figure 1.
- 3. Use an AC voltmeter, with 1 k  $\Omega$  /V or more sensitivity, to measure the potential across the resistor.
- 4. Check each exposed metallic part, and measure the voltage at each point.
- 5. Reverse the AC plug in the AC outlet and repeat each of the above measurements.
- 6. The potential at any point should not exceed 0.75 V RMS. A leakage current tester (Simpson Model 229 or equivalent) may be used to make the hot checks, leakage current must not exceed 1/2 mA. In case a measurement is outside of the limits specified, there is a possibility of a shock hazard, and the equipment should be repaired and rechecked before it is returned to the customer.

Hot-Check Circuit AC VOLTMETER 0 0.15 uF EARTH GROUND

Figure. 1

## 2. PREVENTION OF ELECTRO STATIC DISCHARGE (ESD) TO ELECTROSTATICALLY SENSITIVE (ES) **DEVICES**

Some semiconductor (solid state) devices can be damaged easily by static electricity. Such

components commonly are called Electrostatically Sensitive (ES) Devices. Examples of typical ES devices are integrated circuits and some field-effect transistors and semiconductor "chip" components. The following techniques should be used to help reduce the incidence of component damage caused by electro static discharge (ESD).

- 1. Immediately before handling any semiconductor component or semiconductor-equipped assembly, drain off any ESD on your body by touching a known earth ground. Alternatively, obtain and wear a commercially available discharging ESD wrist strap, which should be removed for potential shock reasons prior to applying power to the unit under test.
- 2. After removing an electrical assembly equipped with ES devices, place the assembly on a conductive surface such as aluminum foil, to prevent electrostatic charge buildup or exposure of the assembly.
- 3. Use only a grounded-tip soldering iron to solder or unsolder ES devices.
- 4. Use only an antistatic solder removal device. Some solder removal devices not classified as "antistatic (ESD protected)" can generate electrical charge sufficient to damage ES devices.
- 5. Do not use freon-propelled chemicals. These can generate electrical charges sufficient to damage ES devices.
- 6. Do not remove a replacement ES device from its protective package until immediately before you are ready to install it. (Most replacement ES devices are packaged with leads electrically shorted together by conductive foam, aluminum foil or comparable conductive material).
- 7. Immediately before removing the protective material from the leads of a replacement ES device, touch the protective material to the chassis or circuit assembly into which the device will be installed.

#### **CAUTION:**

- Be sure no power is applied to the chassis or circuit, and observe all other safety precautions.
- 8. Minimize bodily motions when handling unpackaged replacement ES devices. (Otherwise harmless motion such as the brushing

together of your clothes fabric or the lifting of your foot from a carpeted floor can generate static electricity (ESD) sufficient to damage an ES device).

#### 3. OPERATION GUIDE

## 4. SERVICE NOTES (PLEASE READ)

#### 4.1. SERVICE NOTES

#### 4.1.1. EXTENSION CABLES FOR SERVICE

Using the following Extension Cables, place the unit as shown for check and service.

No.	PART NUMBER	PART NAME	CONNECTION
1	VUV\$0007	12Pin Extension Cable	FP8 on Main C.B.A. ~ CCD F.P.C. on Lens Unit
	VUVS0012	22Pin Extension Cable	FP9 on Main C.B.A. ~ Lens F.P.C. on Lens Unit
(3)	VUVS0015	28Pin Extension Cable	FP1 on Main C.B.A. ~ A/C Head/Capstan F.P.C. on VCR Mechanism Chassis Ass'y

#### NOTE:

- 1. When using the cassette tape:
  - A. Be sure to remove a cassette lid cover of cassette tape.
  - B. Be sure to install the Lock Screw to Cassette Up Unit. After servicing, be sure to remove the Lock Screw.

    Refer to "HOW TO HOLD THE CASSETTE UP UNIT IN THE DOWN POSITION WITHOUT CASSETTE COVER INSTALLED."
  - C. Select the H. SAFETY DEFEAT in SERVICE MODE. Refer to "

    SERVICE MODE SPECIFICATION (SELF-DIAGNOSTIC SYSTEM).
    "

Or, connect a silicon diode on component side of the Main C.B.A. as shown to defeat safety function. (Since Takeup Reel sensor, located on Main C.B.A. does not work when opening Main C.B.A., the mechanism does not work (Reel lock). Therefore, make sure to defeat Safety function.)

- 2. Use extreme care so as not to apply any excessive pressure to the Cylinder/Head Amp F.P.C. After servicing, be sure to place it correctly. Refer to "Cylinder Unit" in "MECHANISM SECTION."
- 3. The LCD open/close SW. is for changing between LCD Display or EVF Display. When turning on LCD Display, place some paper or tape, etc. on LCD open/close SW. so that this SW. stays ON.
- 4. When servicing, avoid causing a from touching the component side of the Battery Catcher Unit to the Main C.B.A.

- 5. When servicing with the Main C.B.A. installed on the VCR Mechanism Chassis Ass'y (Main C.B.A. in raised position), tighten 2 Screws for stability.
- 6. Use a grounded ESD wrist strap while disassembling the Lens portion.
- 7. Use extreme care when unplugging or plugging in connectors.

4.1.2. HOW TO HOLD THE CASSETTE UP UNIT IN THE DOWN POSITION WITHOUT CASSETTE COVER INSTALLED

The Cassette Up Unit will be in the up position without the Cassette Cover installed.

To hold the Cassette Up Unit in the down position without it, a Lock Screw is needed.

4.1.2.1. How to install the Lock Screw:

1. If the Lock Lever, shown in gray, is set to Position "A" (No hole), change Position "A" (No hole) to Position "B" (Hole) as shown in Fig. 2-2 by pushing Portion (a) as shown in Fig. 2-1.

Note:

If the mechanism is in EJECT position, the Lock Lever cannot be changed to Position "B" by pushing Portion (a). In this case, apply power to set the mechanism to STOP position.

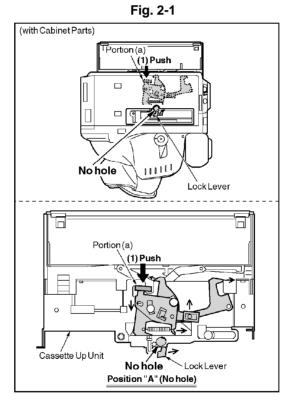

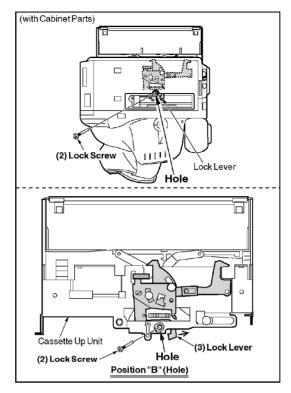

Fig. 2-2

- 2. Install the Lock Screw in the Hole (Threaded Hole for Lock Screw access) in Position "B".
- 3. Hold down the Cassette Up Unit and confirm that the Cassette Up Unit will stay in the down position.

#### Note:

If the Cassette Up Unit will not stay in the down position, slide the Lock Lever to the right slightly.

4.1.2.2. Lock Screw is required when:

- 1. performing "TAPE INTERCHANGEABILITY ADJUSTMENT."
- 2. servicing with cassette tape in Service Position. The procedure below is required when the unit is in safety defeat mode.
  - A. Confirm that the Lock Lever, shown in gray, is set to Position "A" as shown in Fig. 2-1, and that the mechanism is in the STOP position.
  - B. Insert the cassette tape.
  - C. Push Portion (a) as shown in Fig. 2-1 while keeping the Cassette Up Unit in the down position so the mechanism starts loading. (Cassette Down Switch is ON.)

#### - CAUTION:

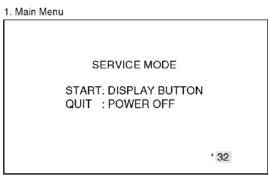

After servicing, be sure to remove the Lock Screw.
 The replacement Cassette Up Unit and VCR
 Mechanism Chassis Ass'y are supplied with a Lock
 Screw installed. Make sure to remove this Lock
 Screw when replacing them.

#### 4.1.3. SERVICE MODE SPECIFICATION (SELF-DIAGNOSTIC SYSTEM)

#### Operation:

- 1. Start-up: Press and hold all of the Display, REC, and Stop buttons over 2 seconds, the unit goes into the self- diagnostic mode and main menu appears.
- 2. Mode Selection: Press display button to change and select selfdiagnose mode.
- 3. Close: Turn off the Power Switch.

Display: Following descriptions can be displayed on EVF and TV monitor at the same time.

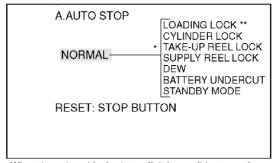

Press and hold all of the Display, REC and Stop buttons over 2 seconds. The Main Menu appears on E.V.F. and TV monitor

\* This figure stands for the Model No. of camcorder as shown.

#### 2. Auto Stop

When the unit suddenly shuts off, It is possible to see the cause description in this menu. Even if the AC adaptor or battery is disconnected, the most recent failure will be memorized. Pressing the Stop button at this time will reset the memory.

\* Cause descriptions can be displayed until power shuts off. \*\* LOADING LOCK --- EJECT

STOP STBY

REC / PB (When it is possible to detect the lock position, loading lock position can be displayed.)

#### 3. Auto Test

#### **B.AUTO TEST**

SET VCR/CAMERA SW TO CAMERA

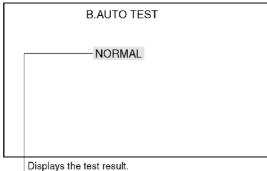

- 1. CASSETTE TAPE IN 2. PRESS REC BUTTON
- a. Cassette tape in and press REC button.b. The unit operates automatically on tests.

#### **B.AUTO TEST**

- REC
- □ REVIEW
- ☐ PLAY
- ☐ REC PAUSE
- a. Automatically operates REC (30sec), REVIEW, PLAY, and STOP.
- b. Displays the test status while auto test is progressing.
   (■ Mark shows the test status.)

LOADING LOCK \*\* CYLINDER LOCK
TAKE-UP REEL LOCK SUPPLY REEL LOCK DEW BATTERY UNDERCUT STANDBY MODE

- \* Cause descriptions can be displayed until power shuts off. \*\* LOADING LOCK --- EJECT
- STOP STBY REC / PB

(When it is possible to detect the lock position, loading lock position can be displayed.)

4. Motor Control Signal Check

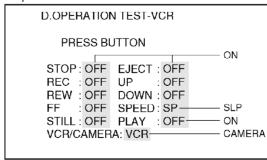

#### C.SIGNAL TEST : STOP-FWD, REV CAPSTAN(M) CYLINDER(M) : ON----OFF : STOP-FWD, REV LOADING(M) : STOP-WIDE, TELE ZOOM(M) : STOP—FAR, NEAR FOCUS(M) IRIS(F NO.) : 7F --NO.\* CASSETTE SW DOWN-UP SAFETY TAB SW: OK-BRK

Displays all of motor drive signals and switch inputs from mechanism chassis.

<sup>\*</sup> Iris No. display

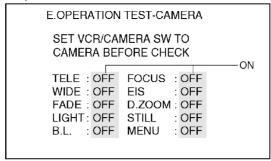

5. Operation Button Test - VCR

Tests connection of VCR operation buttons by pressing each button.

#### 6. Operation Button Test - Camera

Tests connection of camera operation buttons by pressing each button.

#### 7. Loading Test

F.LOADING TEST

SET VCR/CAMERA SW TO VCR

START: REC BUTTON QUIT : STOP BUTTON

Repeats loading / unloading 10 times without tape to check loading mechanism.

#### 8. Mechanism Position

#### G.MECHANISM POSITION

- EJECT
- ☐ STOP STANDBY
- □ STANDBY
- ☐ REC/PLAY/FF

Displays mechanism position by monitoring mode switch.

(mark shows the current mechanism position.)

#### 9. Safety Defeat

H.SAFETY DEFEAT

SET VCR/CAMERA SW TO VCR

- 1.CLOSE CASSETTE DOOR WITHOUT TAPE
- 2.PRESS OPERATION BUTTONS
- a. Defeats following safety functions. Cylinder lock, Reel lock, End of tape, Battery under cut, Safety tab switch.
- b. It is possible to check mechanism movement without tape by pressing operation buttons in this mode.

Another Method to put the unit into Safety Defeat mode: Connect a silicon diode between TP6011 and TP6012 on component side of the Main C.B.A. Refer to "EXTENSION CABLES FOR SERVICE" in "SERVICE NOTES."

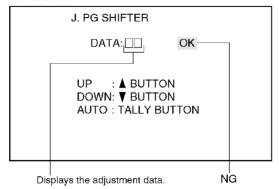

#### 10. Tracking Fix

I. TRACKING FIX	

Functions to fix tracking position to its center for tape path alignment.

#### 11. PG Shifter

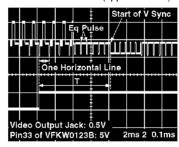

This is a function to adjust Head Switching Position (PG SHIFTER) without using the Personal Computer. Perform adjustment procedure (AUTO) or (MANUAL). To adjust with this function, the TP Board, Audio/Video cable, oscilloscope, and VHS-C Alignment Tape (VFMS0004H6C) are necessary.

For connecting TP Board, refer to "HOW TO USE TP BOARD" in SERVICE NOTES.

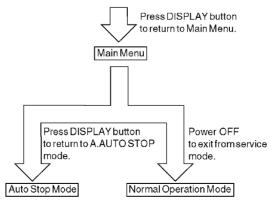

#### Adjustment procedure (AUTO)

- Insert the VHS-C Alignment Tape to the camcorder.
- 2. Press PLAY button.
- Press TALLY (REC) button while playing back.
   Head Switching Position (PG SHIFTER) will be adjusted automatically.
- 4. "OK" indicator will be displayed on EVF. Note:
  - If "NG" indicator is displayed, adjust again.
- 5. Confirm that T is 6.5 H±0.5 H (approx.0.4 ms) as shown.

- Adjustment procedure (MANUAL)

  1. Perform steps 1 ~ 2 in Adjustment procedure (AUTO).
- 2. Press UP ▲ or Down ▼ button while playing back so that T is 6.5 H ± 0.5 H (approx. 0.4 ms).

If any of the following numbers appear on-screen in Photo mode, the palmcorder may need service. Do not remove the battery (if attached) and write down the displayed number.

Error No.	Description	
U11	Card Error	
U12	Card Error	
U13	Card Error	
U14	Card/Camcorder Dialogue Error	
U15	No Card Memory	
U16	Captured image limit exceeded	
U17	Captured image limit exceeded	
U30	Error other than above	

#### Note:

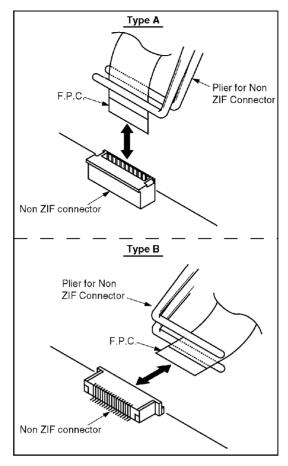

While battery remains, the Error No. will be displayed again when the power is switched off and on again. (Once the Battery is removed or dead, Error No. will not remain in the memory.)

4.1.4. REMOVAL/INSTALLATION OF F.P.C. FROM NON ZIF (ZERO INSERTION FORCE) CONNECTOR

Removal/Installation of F.P.C. from the Non ZIF (Zero Insertion Force) connector:

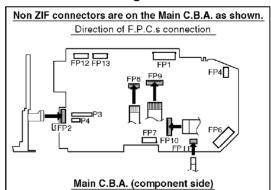

- 1. There are 2 types (Type A, Type B) of Non ZIF connectors.
- 2. To remove the F.P.C. from the Non ZIF connector, use the Plier for Non ZIF Connector (LSVQ0028) to pull out the F.P.C. as shown. The same Plier for Non ZIF Connector (LSVQ0028) should also be used to install the F.P.C. to the Non ZIF Connector.

Flg. 3-1

3. Connect the F.P.C.s to the Non ZIF connectors, verifying the direction of F.P.C as shown.

Fig. 3-2

#### 4.1.5. METHOD FOR LOADING/UNLOADING OF MECHANISM

4.1.5.1. (Electrical Method)

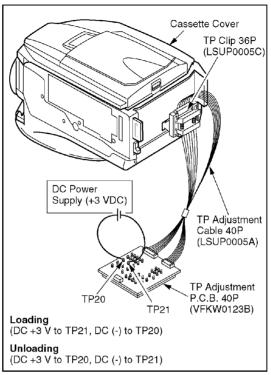

#### **CAUTION:**

If loading does not start after DC Power Supply is applied, DO NOT continue to applying DC Power Supply.

Connect the TP Board as shown, and apply 3 VDC Power Supply (DC (+) to TP21, DC (-) to TP20 for loading or DC (+) to TP20, DC (-) to TP21 for unloading). Refer to "HOW TO USE TP BOARD."

It normally takes approx. 6 seconds to unload the Mechanism from fully-loaded position to EJECT position.

Fig. 4-1

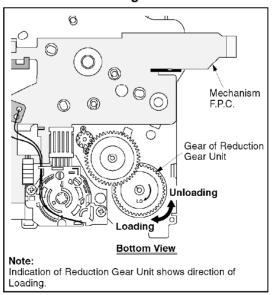

4.1.5.2. (Manual Method) without Cabinet Parts

Turn the Gear of Reduction Gear Unit clockwise (for loading) or counterclockwise (for unloading) manually.

It is necessary to rotate approx. 80 times from fully-loaded position to EJECT position.

Fig. 4-2

#### 4.1.6. HOW TO REMOVE A JAMMED TAPE

#### **CAUTION:**

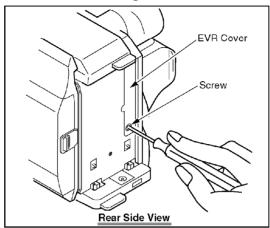

If loading does not start after DC Power Supply is applied, DO NOT

#### continue applying DC Power Supply.

Remove a jammed tape as follows:

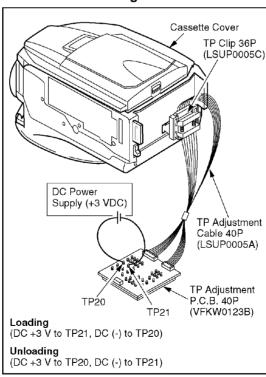

1. Remove a Screw and remove the EVR Cover.

Fig. 5-1

- 2. Place the unit with the Cassette Cover facing upward.
- 3. Connect the TP Board through the TP Board slot.
- 4. Apply +3VDC Power Supply to TP20 (+) and TP21 (-) on the TP Board to unload the mechanism. It normally takes approx. 6 seconds to unload the Mechanism to EJECT position. Then, remove the Power Supply and remove the TP Board.

Fig. 5-2

- 5. Open the Cassette Cover fully.
- 6. Remove the tape slack by rotating the Takeup Reel Gear of the cassette tape.

Takeup Reel Gear

Bottom View

7. Take out the cassette tape.

8. Connect the Power or Battery to set the Mechanism to STOP Position.

#### 4.1.7. HOW TO USE TP BOARD

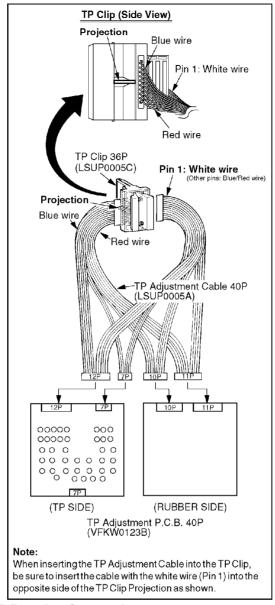

4.1.7.1. TP Board is required when:

- 1. performing "TAPE INTERCHANGEABILITY ADJUSTMENT."
- 2. performing "PC-EVR Adjustment."
- 3. the cassette tape is jammed. Refer to "HOW TO REMOVE A JAMMED TAPE."
- 4. loading or unloading the Mechanism (Electrical Method).
- 5. performing a signal check.

4.1.7.2. How to assemble TP Board:

1. Assemble the TP Board as shown.

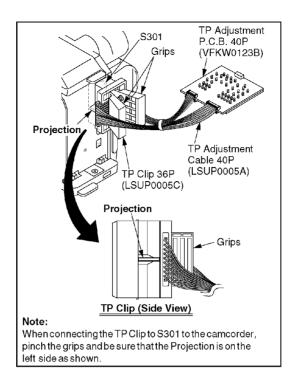

Fig. 6-1

4.1.7.3. How to connect TP Board to Camcorder:

#### 1. Connect the TP Board to Camcorder as shown.

Fig. 6-2

4.1.7.4. Signal description on TP Adjustment P.C.B. 40P (VFKW0123B)

Fig. 6-3-1

Pin No.	Signal Name	Description	Waveforms
1	GND	Grounding terminal	
2	IRIS	To monitor IRIS at Pin 33 of IC605 on Main C.B.A.	0.4Vp-p  Camera Mode (Gray Scale Chart)
3	GND	Grounding terminal	
4	Not used		
5	Not used		
6	EVR MODE (L)	EVR mode select: low	
7	CAM +4.5 V	Power terminal	
8	EVR SERIAL DATA 1	Serial data output from PC to camcorder	
9	V-SYNC	To monitor V sync signal at Pin 18 of IC602 on Main C.B.A.	3.4Vp-p  1V 5ms Camera Mode
10	EVR SERIAL DATA 0	Serial data output from camcorder to PC	
11	CAMERA RESET (L)	Camera microcontroller reset: low	
12	Not used		
13	EVR SERIAL CLOCK	Serial clock between PC and camcorder	
14	EVF +4.5 V	Power terminal	
15	Not used		
16	Color EVF-Blue	To monitor Color EVF blue signal at Pin 11 of IC901 on Color EVF C.B.A.	8.5Vp-p  AV  2V  20us  Rec/PB Mode (Color Bar Chart)
17	Color EVF-Green	To monitor Color EVF green signal at Pin 14 of IC901 on Color EVF C.B.A.	8.5Vp-p  Rec/PB Mode (Color Bar Chart)

Fig. 6-3-2

Pin No.	Signal Name	Description	Waveforms
18	LUMINANCE	To monitor luminance signal at Pin 78 of IC301 on Main C.B.A.	1.0Vp-p  1.0Vp-p  Camera Mode (Color Bar Chart)
19	Color EVF-Red	To monitor Color EVF red signal at Pin 16 of IC901 on Color EVF C.B.A.	8.5Vp-p  Rec/PB Mode (Color Bar Chart)
20	LOADING MOTOR 0	To monitor supply voltage to loading motor (+4.5 V or GND)	
21	LOADING MOTOR 1	To monitor supply voltage to loading motor (+4.5 V or GND)	
22	SUPPLY REEL PULSE	To monitor supply reel pulse at Pin 80 of IC6001 on Main C.B.A.	4.0Vp-p
23	Not used		
24	Not used		
25	PB CTL PULSE	To monitor PB control pulse at Pin 76 of IC6001 on Main C.B.A.	4.5Vp-p
26	SUPPLY PHOTO TR (L)	To monitor Supply Photo TR signal (TR on: low)	
27	CAP FG	To monitor capstan FG signal at Pin 67 of IC6001 on Main C.B.A. (SP: 2155 Hz, SLP: 719 Hz)	3.0Vp-p 3.0Vp-p 1V 0.2ms PB Mode(SP) PB Mode(SLP)
28	TRAP MONITOR	To monitor B-Y signal at Pin 37 of IC3001 on the Main C.B.A.	Rec/PB Mode 0.1V 20us (Color Bar Chart)

Fig. 6-3-3

Pin No.	Signal Name	Description	Waveforms
29	H-SYNC	To monitor H sync signal at Pin 61 of IC3001 on Main C.B.A. (In EVR adjustment mode, 629kHz carrier appears.)	1V 20us Rec/PB Mode
30	PB LUMINANCE	To monitor DR luminones signal at	0.3Vp-p
30	PB LUMINANGE	To monitor PB luminance signal at Pin 23 of IC3001 on Main C.B.A.	0.1V 5ms PB Mode
31	YNR	To monitor YNR error signal at Pin 21 of IC3001 on Main C.B.A.	15mVp.p   20us PB Mode
32	ENVELOPE	To monitor PB envelope signal at Pin1 of FP6 on Main C.B.A.	0.55Vp-p  0.2V 5ms PB Mode
33	HEAD SW	To monitor head switching signal at Pin 23 of IC6001 on Main C.B.A.	2V 5ms PB Mode
34	Not used		
35	GND	Grounding terminal	
36	GND	Grounding terminal	
37	REC CHROMINANCE	To monitor recording chrominance signal at Pin 38 of IC3001 on Main C.B.A.	0.4Vp-p
38	REC LUMINANCE	To monitor recording luminance signal at Pin 27 of IC3001 on Main C.B.A.	0.45Vp-p  0.11V 5ms Rec Mode
39	Not used		
40	Not used		

#### **4.1.8. EEPROM DATA**

#### **CAUTION:**

Be sure to save the EEPROM data using PC-EVR Adjustment Program before service and adjustment in order to make sure to avoid an accidental data loss, etc. as follows. Refer to "SET UP OF PC-EVR ADJUSTMENT PROGRAM" in ELECTRICAL ADJUSTMENT.

#### EEPROM IC

C.B.A.	EEPROM IC Ref. No.
Main C.B.A.	IC306

How to save the EEPROM data to your PC

- 1. Start up the PC-EVR Adjustment Program.
- 2. Select "1. Read (Save)/Write All EEPROM datas." in Main menu, and then press "Enter" key.
- 3. Select "1. Save all data of EEPROM" in Read (Save)/Write All EEPROM datas menu, and then press "Enter" key.
- 4. Input the File name, and then press "Enter" key. The data of EEPROM IC will be stored to your PC.

How to write the EEPROM data which was stored in your PC to EEPROM IC When it becomes impossible to adjust during service and adjustment, write the EEPROM data which was stored in your PC to EEPROM IC as follows. And readjust the camcorder.

- 1. Start up the PC-EVR Adjustment Program.
- 2. Select "1. Read (Save)/Write All EEPROM datas." in Main menu, and then press "Enter" key.
- 3. Select "2. Data write using stored file" in Read (Save)/Write All EEPROM datas menu, and then press "Enter" key.
- 4. Input the saved file name, and then press "Enter" key. The data will be written in EEPROM IC.

How to initialize the EEPROM IC

When the EEPROM IC (IC306) or Main C.B.A. is replaced, be sure to write the initial data to EEPROM IC. And adjust the camcorder.

- 1. Start up the PC-EVR Adjustment Program.
- 2. Select "1. Read (Save)/Write All EEPROM datas." in Main menu, and then press "Enter" key.
- 3. Select "3. Data write with initial data" in Read (Save)/Write All EEPROM datas menu, and then press "Enter" key. And press "Enter" key once again. The initial data will be written in EEPROM IC.

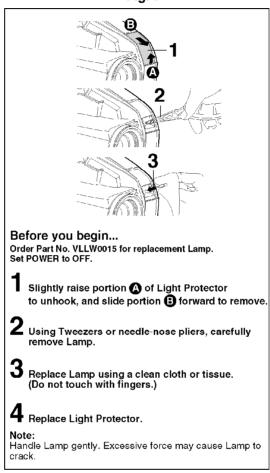

#### 4.1.9. HOW TO REPLACE THE LAMP

#### **DANGER:**

Use only replacement Lamp (PART NO. VLLW0015) supplied by Panasonic to reduce risk of fire. Handle new Lamp with cloth or tissue as skin oils will decrease Lamp life.

Remove Light Protector and allow Lamp to cool before replacing to avoid possible burn hazard.

Fig. 7

#### 4.1.10. HOW TO ACCESS THE MANUAL TRACKING CONTROL

Press the UP▲ (Tracking Up) or Down▼ (Tracking Down) button to perform the Manual Tracking Adjustment in Playback Mode.

#### 4.1.11. REPLACEMENT PROCEDURE FOR LEADLESS (CHIP) COMPONENT

The following procedures are recommended for the replacement of the leadless components used in this Unit.

#### 1. Preparation for replacement

A. Soldering Iron

Use a pencil-type soldering iron using less than 30 watts.

B. Solder

Eutectic Solder (Tin 63 %, Lead 37 %) is recommended.

C. Soldering time

Do not apply heat for more than 4 seconds.

D. Preheating

Leadless capacitor must be preheated before installation. (130 °C ~ 150 °C, for about 2 minutes.)

Note:

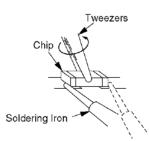

- A. Leadless component must not be reused after removal.
- B. Excessive mechanical stress and rubbing of the component electrode must be avoided.
- 2. Removing the leadless component

Grasp the leadless component body with tweezers and alternately apply heat to both electrodes. When the solder on both electrodes is melted, remove leadless component with a twisting motion.

Note:

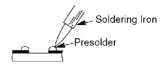

- A. Do not attempt to lift the component off the board until the component is completely disconnected from the board by a twisting action. The leadless component is attached to the PCB with glue. So carefully twist the component when removing it so as not to break or damage any fail under the component.
- B. Take care not to break the copper foil on the printed board.

Fig. 8-1

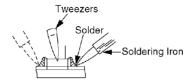

- 3. Installation of the leadless component
  - A. Presolder the contact points of the circuit board.

Fig. 8-2

B. Press the part downward with tweezers and solder both electrodes as shown below.

#### Note:

# Do not glue the replacement leadless component to the circuit board.

#### 4.1.12. SPECIAL NOTE

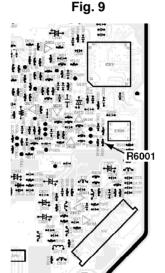

All integrated circuits and many other semiconductor devices are electrostatically sensitive and therefore require the special handlings techniques described under the "ELECTROSTATICALLY SENSITIVE (ES) DEVICES" section of this service manual.

#### 4.1.13. IC501 AND IC6001 REPLACEMENT NOTE

IC501 and IC6001 are supplied together only as a Microcontroller Kit (LSUC0005). Microcontroller Kit consists of IC6001, IC501, and Instruction Sheet.

When replacing either IC6001 or IC501, be sure to replace both IC6001 and IC501. When R6001 is found on the Main C.B.A., be sure to remove it at the same time.

Otherwise, normal operation may not be possible.

Main C.B.A. (component side)

#### 4.1.14. MODEL NO. IDENTIFICATION MARK

Use Marks shown in the chart below to distinguish the different models included in this Service Manual.

MODEL	MARK
PV-L452	Α
PV-L652	В
NOT USED	PT

#### Note:

Refer to Item 3 of Schematic Diagram Notes of Schematic Diagram

#### and Circuit Board Layout Notes, for Mark "PT."

### 5. DISASSEMBLY/ASSEMBLY PROCEDURES

#### **5.1. CABINET SECTION**

#### 5.1.1. DISASSEMBLY FLOWCHART

This flow chart indicates the disassembly steps of the cabinet parts and the P.C.Boards in order to gain access to item (s) to be serviced. When reassembling, perform the step (s) in the reverse order. Bend, route and dress the wires as they were originally.

Fig. D1 MAIN PARTS PORTION 1 Cassette Cover and LCD Ass'y LCD PORTION 2 EVR Cover 3 Side Case L Ass'y ► SIDE CASE L PORTION COLOR EVF PORTION 4 Sensor Shield Case 5 Lens Ass'y CCD & LENS PORTION 6 Main C.B.A. 7 VCR Mechanism Chassis Ass'y 8 Side Case R Ass'y SIDE CASE R & LAMP PORTION

#### Note:

- 1. When removing the cabinet, work with care so as not to break the Locking Tabs.
- 2. Place a cloth or some other soft material under the P.C. Boards or Unit to prevent damage.
- 3. When reinstalling, ensure that the connectors are connected and electrical components have not been damaged.
- 4. Do not supply power to the unit during disassembly and reassembly.
- 5.1.2. Disassembly Method

#### 5.2. MECHANISM SECTION

#### 5.2.1. Disassembly Method

This procedure starts with the condition that the cabinet parts and Main C.B.A. have been removed. When reassembling, perform the step(s) in the reverse order. Perform all disassembly and alignments procedures in STOP Position except disassembly and alignment procedures which have the special Notes.

STEP LOC. No.	Prior Step (s)	Part	Fig. No.	Remove
(1)	-	Cassette Up Unit	DM3-1,2	2 🐯, 2(L-1)

- A B C

  How to read chart shown above:

  A: Order of Procedure steps.
  When reassembling, perform steps(s) in reverse order.
  These numbers are also used as the identification (location) No. of parts in Figures.

  B: Steps to be completed prior to the current step.
  C: Part to be removed or installed.
  D: Fig. No. showing Procedure or Part Location.

  E: Identification of part to be removed, unhooked, unlocked, released, unplugged, unclamped, or unsoldered.
  2 
  ② = 2 Screws ③, 2(L-1) = 2 Looking Tabs (L-1)

#### CAUTION:

- a. Use a wrist strap to provide ESD protection while disassembling or assembling.
  b. Removed Cut Washer is not reusable. If removed, install
- a new one. Following Cut Washers are to be used:

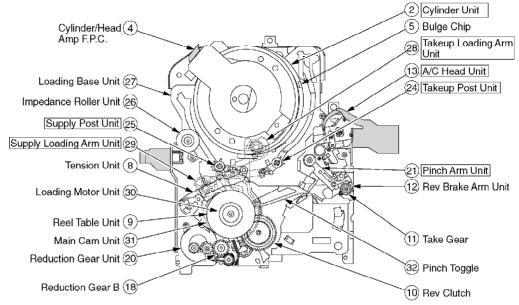

Ref. No.	Part No.
409	VMXW0217
<b>41</b> )	VMXW0213
<b>4</b> 19)	VMX2026

#### 5.2.2. Inner Parts Location

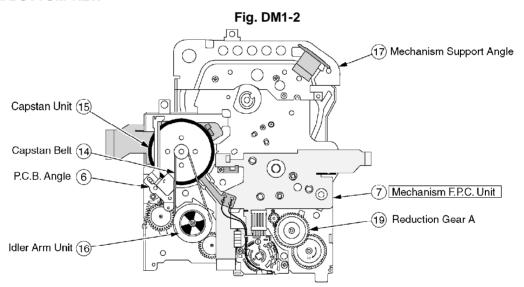

Note:
BOX indicates alignment (Gear alignment or Tape Interchangeability adjustment) required when a part is replaced.

5.2.20. Takeup Post Unit, Supply Post Unit

Fig. DM18-1

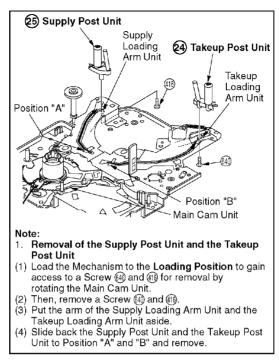

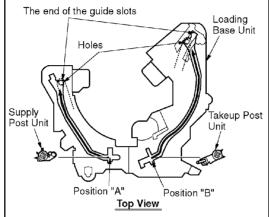

Fig. DM18-2

#### Reassembly Note:

- Installation of the Supply Post Unit and the Takeup **Post Unit**
- (1) Confirm that the end of the arm (the threaded hole) of Supply Loading Arm Unit and the end of the arm (the threaded hole) of Takeup Loading Arm Unit are in the
- end of the guide slots.

  (2) Install the Supply Post Unit and the Takeup Post Unit into Position "A" and "B" while being careful of the direction of the Supply Post Unit and the Takeup Post
- (3) Slide the Supply Post Unit and the Takeup Post Unit to the end of guide slots as shown.

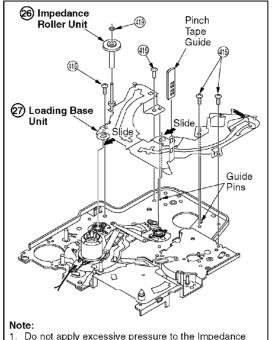

- (4) Align the Hole of the Supply Loading Arm Unit with the Threaded Hole of the Supply Post Unit. Do the Same with the Takeup Post Unit.
- Tighten a Screw (44) and (416). Caution:

Be careful of the following when tightening a Screw (49) and (416).

- 1. Be sure to tighten screws straight.
- 2. Do not over tighten screws.
- Adjustment of the Supply Boat Unit and Takeup Boat Unit
- After replacing, perform the "Tape Interchangeability Adjustment" procedures.

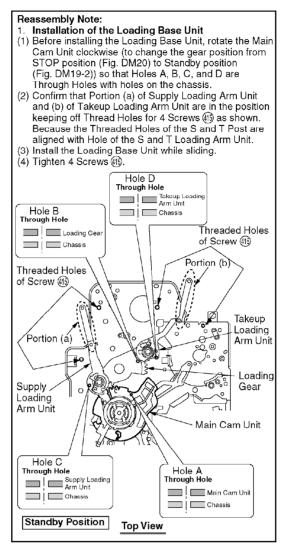

# 5.2.21. Impedance Roller Unit, Loading Base Unit

Fig. DM19-1

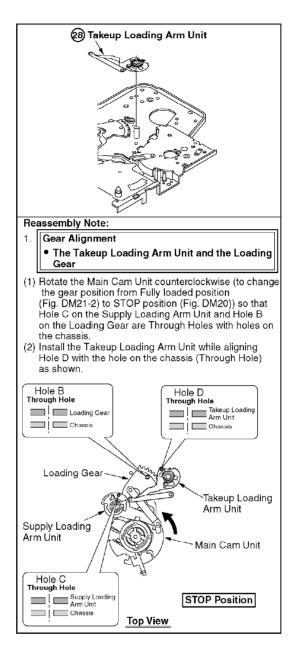

- Do not apply excessive pressure to the Impedance Roller Unit.
   Removal of the Loading Base Unit
- Do not apply excessive pressure to the Loading Base Unit so as not to bend.
- When removing the Loading Base Unit, remove 4
- (1) When removing the Loading Base Screws (5).
  (2) Release 2 Guide Pins while lifting up the Loading Base Unit slightly. Then, remove the Loading Base Unit after sliding as indicated by the arrow.

Fig. DM19-2

## 5.2.22. Takeup Loading Arm Unit

5.2.23. Supply Loading Arm Unit

Fig. DM21-1

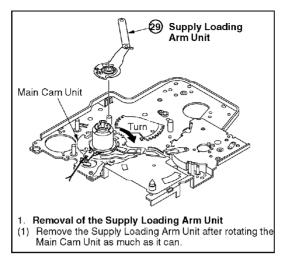

Fig. DM21-2

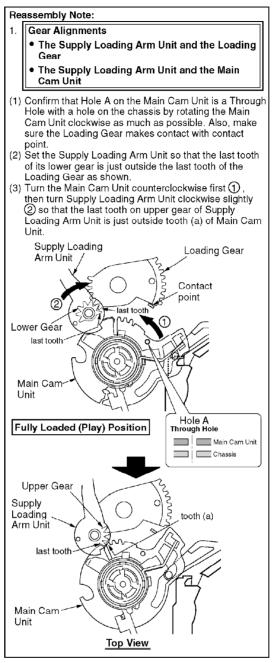

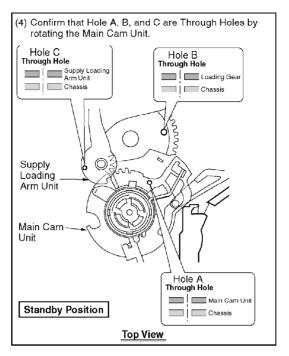

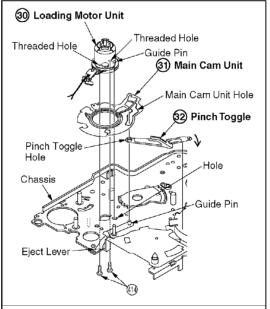

Fig. DM21-3

# 5.2.24. Loading Motor Unit, Main Cam Unit, Pinch Toggle Fig. DM22

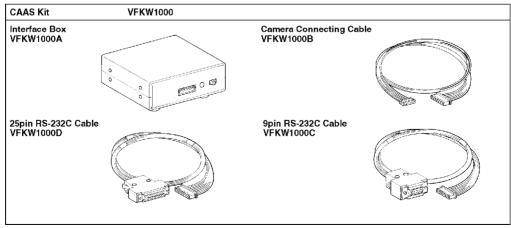

#### Reassembly Note:

- Do not pull the Eject Lever upward so as not to bend it.
   Installation of the Pinch Toggle and the Main Cam
- Unit
- (1) Install the Pinch Toggle so that the Pinch Toggle Hole fit over the Guide Pin.
- (2) Install the Main Cam Unit so that Guide Pin fits in the Main Cam Unit Hole.
- Installation of the Loading Motor Unit
- (1) Install the Loading Motor Unit the Guide Pin fits in Hole on chassis.
- (2) Tighten 2 Screws (14). If the 2 Screws (14) can not reach Threaded Holes, push down on the upper side of the Loading Motor Unit to tighten 2 Screws (1).

# **6. ADJUSTMENT PROCEDURES**

# **6.1. SERVICE FIXTURES & TOOLS**

### 6.2. MECHANICAL ADJUSTMENT

#### 6.2.1. CLEANING PROCEDURE FOR THE UPPER CYLINDER UNIT

1. While slowly turning the Upper Cylinder Unit counterclockwise by hand, gently rub the Video Heads with a Head Cleaning Stick (VFK27) moistened with Isopropyl Alcohol 91 %.

Fig. M1

Head Cleaning Stick (VFK27)

Counterclockwise

Note:

A. Do not rub vertically or apply excess pressure to the Video Heads.

Do not turn the Upper Cylinder Unit clockwise while cleaning.

B. After cleaning, use a Dry Head Cleaning Stick (VFK27) to remove any Isopropyl Alcohol 91 % remaining on the cylinder tape path. Otherwise, tape damage will occur.

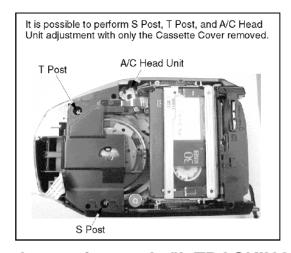

### **6.2.2. ADJUSTMENT PROCEDURES**

6.2.2.1. TAPE INTERCHANGEABILITY ADJUSTMENT

Before perform these Adjustment/Confirmation procedures, be sure to complete following items.

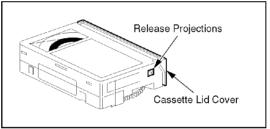

1. Connect the TP Board to S301 on the camcorder. Refer to "HOW TO USE TP BOARD" in "SERVICE NOTES."

Fig. M2-1

- 2. Put the unit into the service mode "I. TRACKING FIX" to defeat Auto Tracking. Refer to "SERVICE MODE SPECIFICATION (SELF-DIAGNOSTIC SYSTEM)" in "SERVICE NOTES."
- 3. Remove the Cassette Lid Cover from the Cassette Tape or the Alignment Tape.

Fig. M2-2

# **Equipment Required:**

**Dual Trace Oscilloscope** 

VHS-C Alignment Tape (VFMS0004H6C)

**VHS-C Alignment Tape (VFMW0001C)** 

**Screwdriver Set (Purchase Locally)** 

**TP Board** 

TP Adjustment Cable 40P (LSUP0005A)

TP Adjustment P.C.B. 40P (VFKW0123B)

TP Clip 36P (LSUP0005C)

6.2.2.1.1. ENVELOPE OUTPUT ADJUSTMENT

The height of the S and T Posts replacement part is preset at the factory.

# **Purpose:**

To achieve a satisfactory picture and secure precise tracking.

# **Symptom of Misadjustment:**

If the envelope is output poorly, much noise will appear in the picture. Then the tracking will lose precision and the playback picture will be distorted by any slight variation of the tracking control circuit.

- 1. Put the unit into the service mode "I. Tracking Fix" to defeat Auto Tracking. Refer to "SERVICE MODE SPECIFICATION (SELF-DIAGNOSTIC SYSTEM)" in "SERVICE NOTES."
- 2. Connect the oscilloscope to Pin 32 (Envelope signal) on the TP Adjustment P.C.B. Use Pin 33 (Head Switch signal) as a trigger.
- 3. Play back the VHS-C Alignment Tape (VFMS0004H6C).
- 4. Confirm that the RF envelope is flat enough. If not, with Flat Headed (—) Screwdriver, adjust S and T post height so that the envelope waveform becomes as flat as possible (No envelope drop). If the envelope drop appears on the left-half of the waveform, adjust S post height. If the envelope drop appears on the right-half of the waveform, adjust T post height. CAUTION: Do not apply excessive pressure onto the S and T Posts when adjusting S and T post height.

Fig. M3-1
Before Adjustment

Left-half Right-half Adjust S Post Adjust T Post

Oscilloscope

After Adjustment

Make flat (square) as possible.

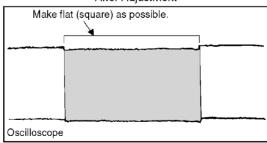

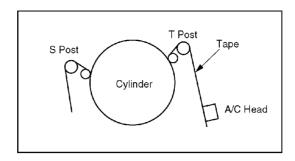

Fig. M3-2

#### Note:

It will be possible to confirm step 4) after performing the following steps.

- A. Exit the "I. TRACKING FIX" mode, then skip the "J. PG SHIFTER" mode to enter other modes (except these 2). Or, close the service mode.
- B. Press the Tracking Control Up or Down button on the camcorder. Make sure that the envelope waveform remains flat. If not, readjust S and/or T post heights.
- 5. After adjustment, confirm that the tape travels without curing at S and T posts.

If curing is apparent, readjust the height of posts.

Fig. M3-3

Curing

Curing

No Good

Curing

No Good

No Good

6.2.2.1.2. A/C HEAD HEIGHT ADJUSTMENT

The height of the A/C Head replacement part is preset at the factory.

## **Purpose:**

To be sure the tape runs properly along the Control Head.

# **Symptom of Misadjustment:**

If the control signal is not properly picked up, Servo Operation can not be achieved.

- 1. Connect the oscilloscope to Pin 25 (PB Control signal) on the TP Adjustment P.C.B.
- 2. Play back the VHS-C Alignment Tape (VFMW0001C)
- 3. Confirm that the Sub Control Signal is 500 mV±200 mV. If not,

slightly and equally adjust Screw A, Screw B, and Screw C on the A /C Head Unit to achieve the sub control signal level of 500 mV±200 mV.

(Sub Control Signal level will decrease when rotating screws clockwise, and increase when rotating screws counterclockwise.)

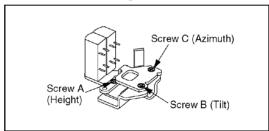

Fig. M4-1

500 mV±200 mV

Sub Control Signal

Fig. M4-2

Pin 25 on TP Adjustment P.C.B

6.2.2.1.3. A/C HEAD AZIMUTH ADJUSTMENT

# **Purpose:**

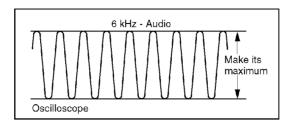

To adjust the position and height of the A/C Head so that it meets the tape tracks properly.

# **Symptom of Misadjustment:**

If the position of the A/C Head is not properly adjusted, the Audio S /N Ratio will be poor.

- 1. Connect the Audio/Video Cable on the camcorder.
- 2. Connect the oscilloscope to audio output jack.
- 3. Playback the VHS-C Alignment Tape (VFMS0004H6C).
- 4. Adjust Screw C (Azimuth) on the A/C Head Unit so that the output level is at maximum.

Fig. M5

- 5. Confirm and readjust the A/C Head height.
- 6. Confirm and readjust Screw C (Azimuth) on the A/C Head so that the output audio becomes is maximum.

6.2.2.1.4. A/C HEAD HORIZONTAL POSITION ADJUSTMENT

# **Purpose:**

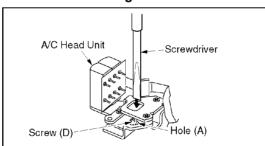

To adjust the Horizontal Position of the A/C Head.

# **Symptom of Misadjustment:**

If the Horizontal Position of the A/C Head is not properly adjusted, maximum envelope can not be obtained at the Neutral Position of the Tracking Control Circuit.

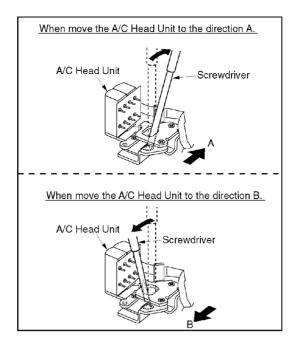

- 1. Put the unit into the service mode "I. TRACKING FIX" to defeat Auto Tracking. Refer to "SERVICE MODE SPECIFICATION (SELF-DIAGNOSTIC SYSTEM)" in "SERVICE NOTES."
- 2. Connect the oscilloscope to Pin 32 (Envelope signal) on the TP Adjustment P.C.B. Use Pin 33 (Head Switch signal) as a trigger.
- 3. Play back the VHS-C Alignment Tape (VFMS0004H6C).
- 4. Set the Screwdriver into the Hole (A) as shown.

Fig. M6-1

5. Slowly move the A/C Head Unit to the direction "A" or "B" as shown so that the envelope is at maximum.

Fig. M6-2

6. To find the center of the maximum period of the envelope, move the A/C Head Unit to confirm the limits on either side of the maximum period.

#### Note:

It will be possible to confirm step 6) after performing the following steps.

- 1. Exit the "I. TRACKING FIX" mode, then skip the "J. PG SHIFTER" mode to enter other modes (except these 2). Or, close the service mode.
- 2. Press the Tracking Control Up Button on the camcorder several times (count the number of times pressed) until the maximum envelope is reduced to 1/2.
- 3. Press the Tracking Control Down Button on the camcorder several times (count the number of times pressed) until the maximum envelope is reduced to 1/2.
- 4. If the number of pressing is not the same, readjust A/C Head horizontal position.

6.2.2.1.5. CONFIRMATION OF ENVELOPE OUTPUT

## Purpose:

To achieve a satisfactory picture and secure precise tracking.

# **Symptom of Misadjustment:**

If the envelope is output poorly, much noise will appear in the picture. Then the tracking will lose precision and the playback picture will be distorted by any slight variation of the tracking control circuit.

- 1. Connect the oscilloscope to Pin 32 (Envelope signal) on the TP Adjustment P.C.B. Use Pin 33 (Head Switch signal) as a trigger.
- 2. Play back the VHS-C Alignment Tape (VFMS0004H6C).
- 3. Confirm that the envelope waveform is as flat as possible (V1/V(max) 0.7).

If adjustment is required, adjust S Post and/or T Post with "—" Screwdriver. Refer to "ENVELOPE OUTPUT ADJUSTMENT."

Fig. M7

Theoretical Waveform

V1

V1/V(max) ≥ 0.7

## **6.3. ELECTRICAL ADJUSTMENT**

#### **6.3.1. INITIAL GUIDELINE**

## **6.3.2. TEST EQUIPMENT**

To do all of the Electrical Adjustment, the following equipments are required.

1. Dual-Trace Oscilloscope

Voltage Range: 0.001 to 50 V/Div. Frequency Range: DC to 50 MHz

Probes: 10:1, 1:1

- 2. DVM (Digital Volt Meter)
- 3. Frequency Counter
- 4. Color TV Monitor
- 5. VHS-C Alignment Tape (VFMS0004H6C)
- 6. Vectorscope

- 7. Plastic Tip Driver
- 8. Audio Video Cable (VJAW0032)
- 9. Power Supply for Interface Box.
- 10. Side L FPC Unit (LSEQ0595)
- 11. Personal Computer

PC: IBM PC/AT or compatible OS: MS-DOS or MS-Windows

CPU: 486 or higher

Drive: 3.5 inch 1.44 MB floppy disk drive

Port: D-Sub-9-pin Serial or D-Sub-25-pin Serial

**Monitor: VGA Color** 

12. PC-EVR Adjustment Program (VF0C2002DV10)

#### Note:

Ask latest version when placing order for PC-EVR Adjustment program.

13. CAAS Kit (VFKW1000)

Interface Box (VFKW1000A)

**Camera Connecting Cable (VFKW1000B)** 

9 Pin RS-232C Cable (VFKW1000C)

25 Pin RS-232C Cable (VFKW1000D)

- 14. TP Adjustment Cable 40P (LSUP0005A)
- 15. TP Adjustment P.C.B. 40P (VFKW0123B)
- 16. TP Clip 36P (LSUP0005C)

(adjustment equipment with using Infinity Lens)

- 17. Lighting (Light Box (VFK1164LBX1) is recommended)
- 18. Infinity Lens (VFK1164TCM02) (with Focus Chart)
- 19. 46 mm Ring (VFK1164TAR46)
- 20. Gray Scale Chart (VFK1164TFGS2)
- 21. Color Bar Chart (VFK1164TFCB2)
- 22. White Chart (VFK1164TFWC2)
- 23. Color Conversion Filter (VFK1164TFCT2)

## (adjustment equipment without using Infinity Lens)

- 24. Lighting (Halogen Lamp (2000 lux))
- 25. Reflection Chart

**Reflection Chart Set (VFKS003-N)** 

(Reflection Chart Set consists of Gray Scale Chart (VFKS003A), Color Bar Chart (VFKS003B), Registration Chart (VFKS003C), and Resolution Chart (VFKS003D)) Gray Scale Chart (VFKS003A) Color Bar Chart (VFKS003B) Registration Chart (VFKS003C) Resolution Chart (VFKS003D) Color Chip Chart (VFKW0116)

- 26. Color Temperature Conversion Filter 80A or equivalent Color Temperature Conversion Filter
- 27. Color Compensating Filter CC05M
- 28. A.W.B. Adjustment Fixture (VFKW0066)

#### 6.3.3. PREPARATION

- 1. Connect the Interface Box to the TP Board with Camera Connecting Cable (VFKW1000B).
- 2. Connect the Interface Box to the Personal Computer with RS-232C Cable (VFKW1000C or VFKW1000D).
- 3. Connect the TP Board to S301 on the camcorder. Refer to "HOW TO USE TP BOARD" in "SERVICE NOTES."
- 4. Connect the AC Adaptor and camcorder, and apply DC +6 V to the Interface Box.
- 5. Power on the camcorder.

#### Note:

In case that the camcorder is in DEMO mode, release DEMO mode as follows:

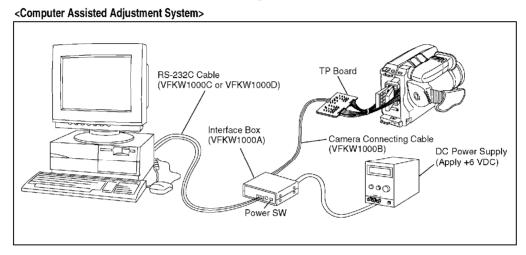

Power off the camcorder first. Then, disconnect the TP Board, and power on the camcorder. Then, press the STOP button over 5 seconds.

#### **CAUTION:**

- 1. Do not connect or disconnect any cables while the camcorder is powered on.
- 2. Before using the TP Board, be sure to clean S301 pattern with

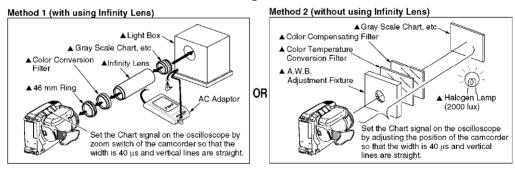

- alcohol and confirm that there is no dust in the TP Clip.
- 3. To achieve the best adjustment results, warm up the camcorder for approx. 30 minutes before adjustment.
- 4. When removing the TP Clip from S301 on the camcorder, be sure to pinch the grips.

Fig. E1-1

6. Set up the camcorder for adjustment as follows:

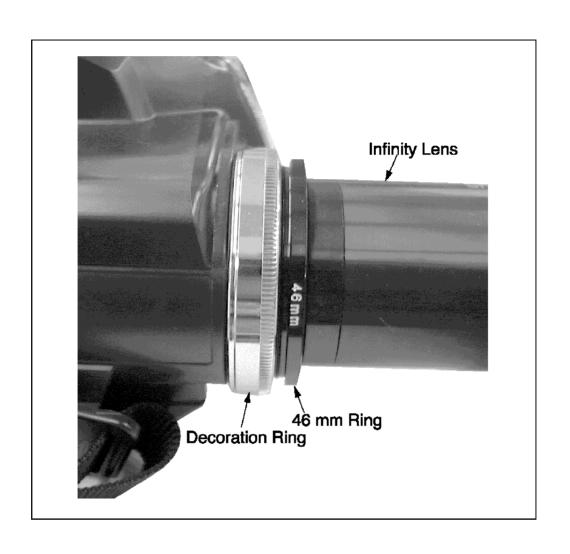

Fig. E1-2

Note: (in Method 1)

- 1. Connect the 46 mm Ring to the Infinity Lens. Then, insert it into the Light Box.
- 2. Set the camcorder so that the Decoration Ring of the camcorder is firmly against the 46 mm Ring.
  When performing this operation, ensure that there is no gap between the Decoration Ring and the 46 mm Ring and that no external light can enter.

For necessary equipments marked A in Fig. E1-2, refer to the following table.

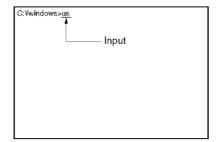

Note 1: Auto Focus adjustment (Automatic adjustment) is available only for Method 1.

Note 2: When performing Auto Focus Adjustment (Automatic Adjustment), be sure to perform under low light conditions.
To carry out this adjustment using the Light Box, create low light conditions artificially as follows.
Set the shutter speed to 1/10,000 or 1/4,000 on the menu display and confirm that there is no flicker in the Focus Chart image at the selected shutter speed.

#### 6.3.4. SET UP OF PC-EVR ADJUSTMENT PROGRAM

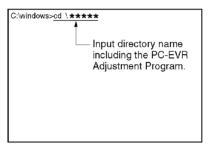

- Turn on the Personal Computer.
   MS-Windows will be set up automatically.
- 2. Restart it in MS-DOS mode.
- 3. Change the current directory to the one including the PC-EVR Adjustment Program and start up the PC-EVR Adjustment Program as follows.
  - A. If MS-DOS is Japanese mode, input "us," and then press "ENTER" key to be US mode on.

Fig.E2-1

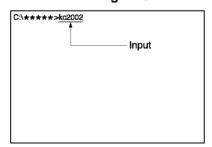

B. Input "cd \ ,\*\*\*\* and then press "ENTER" key to change the directory to the one including the PC-EVR Adjustment Program.

Fig.E2-2

C. Input "kc2002," and then press "ENTER" key to start up the PC-EVR Adjustment Program.

Fig.E2-3

"Select Model Number Menu" will be displayed.

- 4. Select the model number which you are servicing, and then press "Enter" key. The starting display will be displayed.
- 5. Perform set up items according to menu until "Main Menu" is displayed.
- 6. Select "Sub Menu" to adjust or check, etc. the camcorder.

#### 6.3.5. HOW TO USE MAIN MENU

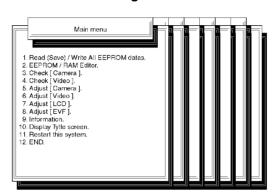

6.3.5.1. Main Menu

Select "Sub Menu" by pressing (UP/DOWN) key in Main Menu. Then, adjust or check the camcorder according to the menu. Then, press "ENTER" key. "Sub Menu" will be displayed.

#### Note:

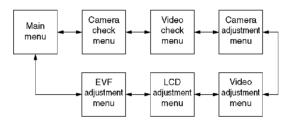

## Menu 5 through 8 are needed for adjustment.

Fig. E3-1

Also, by pressing key, "Sub Menu" can be seen in order below.

Fig. E3-2

#### Note:

The adjusted data is stored to EEPROM IC after each adjustment.

#### 6.3.6. FREQUENCY ADJUSTMENT

6.3.6.1. CAMERA SECTION

## **Purpose:**

To set the chroma subcarrier.

## Symptom of Misadjustment:

The picture will have no color. (The burst shifts)

#### **Test Point:**

**TP601 (Main C.B.A.)** 

## Adjustment:

C619, C620 (Main C.B.A.)

#### **Specification:**

14.31797 MHz ~ 14.31839 MHz (For model with Photo Shot) 9.53482 MHz ~ 9.53510 MHz

(For model	without	<b>Photo</b>	Shot)
------------	---------	--------------	-------

Input:	
Mode:	

## **Equipment:**

Frequency counter

**Adjustment Procedure:** 

- 1. Perform in Service Position to gain access to C619 and C620 (PT) on the Main C.B.A. (foil side).
- 2. Connect the Frequency counter to TP601 on the Main C.B.A. (For model with Photo Shot)
  - A. If the frequency is under 14.31797 MHz, be sure to remove the Capacitor C619 on the Main C.B.A.
    - Then, confirm the frequency is between 14.31797 MHz and 14.31839 MHz.
  - B. If the frequency is over 14.31839 MHz, install a Capacitor (a widely used capacitor: ECUV1H010CCV) to C620 on the Main C.B.A.

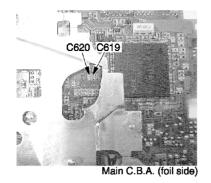

Then, confirm the frequency is between 14.31797 MHz and 14.31839 MHz.

(For model without Photo Shot)

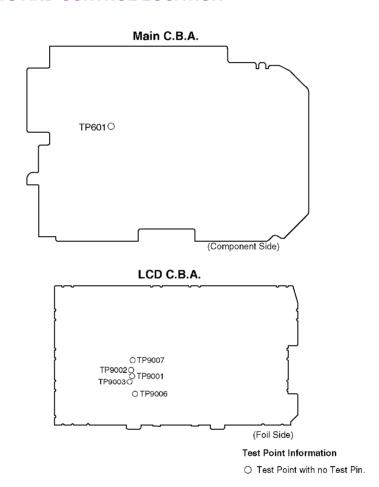

- A. If the frequency is under 9.53482 MHz, be sure to remove the Capacitor C619 on the Main C.B.A.
  - Then, confirm the frequency is between 9.53482 MHz and 9.53510 MHz.
- B. If the frequency is over 9.53510 MHz, install a Capacitor (a widely used capacitor: ECUV1H010CCV) to C620 on the Main C.B.A.

Then, confirm the frequency is between 9.53482 MHz and 9.53510 MHz.

# 11. REPLACEMENT PARTS LISTS

BEFORE REPLACING PARTS, READ THE FOLLOWING:

#### 11.1. REPLACEMENT NOTES

#### 11.1.1. General Notes

1. Use only original replacement parts:

To maintain original function and reliability of repaired units, use

only original replacement parts which are listed with their part numbers in the parts list.

#### 2. IMPORTANT SAFETY NOTICE

Components identified by the sign  $\triangle$  have special characteristics important for safety. When replacing any of these components, use only the specified parts.

#### 3. SPECIAL NOTE

All integrated circuits and many other semiconductor devices are electrostatically sensitive and therefore require the special handling techniques described under the "ELECTROSTATICALLY SENSITIVE (ES) DEVICES" section of this service manual.

- 4. Parts with no Ref. No. in "EXPLODED VIEWS" are not supplied.

  And some Ref. No. will be skipped. Be sure to make your orders of replacement parts according to the parts list.
- 5. Parts different in shape or size may be used. However, only interchangeable parts will be supplied as service replacement parts.
- 6. Parts with mark "VED" in the Remarks column are supplied from VED. Others are supplied from MKI.
- 7. Item numbers with capital letter E (Example: E10, E20,...) in the Ref. No. column are shown in the exploded views.
- 8. Parts whose Ref. Nos. are the same are interchangeable as replacement parts. Any of these parts may be ordered and used as a replacement part.

#### 11.1.2. Mechanical Replacement Notes

1. Section No. of parts shown in Exploded Views are indicated in the Remarks column.

#### 2. Abbreviation

**RTL: Retention Time Limited** 

This indicates that the retention time is limited for this item. After the discontinuation of this item in production, it will no longer be available.

3. Cut Washers (Ref No. 409, 411, and 419) are not reusable. If

removed, install a new one.

- 4. After replacing Mechanism Chassis Ass'y (Ref. No. 49) or Mechanism Chassis Sub Ass'y (Ref. No. 213), perform the Tape Interchangeability Adjustment procedures. Refer to "TAPE INTERCHANGEABILITY ADJUSTMENT" in MECHANICAL ADJUSTMENT.
- 5. Lamp (Ref No. 340) replacement note:

DANGER: Use only replacement Lamp (PART NO. VLLW0015) supplied by Panasonic to reduce risk of fire. Handle new Lamp with cloth or tissue as skin oils will decrease Lamp life. Remove Light Protector and allow Lamp to cool before replacing to avoid possible burn hazard.

6. Operation Plate (Ref No. 343) replacement note:
When replacing the Operation Plate, be sure to bend the Tabs straightly. Refer to "Disassembly Method" of CABINET SECTION in DISASSEMBLY/ASSEMBLY PROCEDURES.

### 11.1.3. Electrical Replacement Notes

1. Unless otherwise specified; All resistors are in  $\Omega$ , K = 1,000  $\Omega$ , M = 1,000 k  $\Omega$ .

2. Abbreviation

**RTL: Retention Time Limited** 

This indicates that the retention time is limited for this item. After the discontinuation of this item in production, it will no longer be available.

NR: Non Repairable Board Ass'y MGF CHIP: Metal Glaze Film Chip

C CHIP: Ceramic Chip

**COMPLX CMP: Complex Component W FLMPRF: Wirewound Flameproof** 

C.B.A.: Circuit Board Assembly P.C.B.: Printed Circuit Board

**E.S.D.: Electrostatically Sensitive Devices** 

#### 3. SERVICE OF CHIP PARTS

When servicing chip parts, please use a soldering iron of less than

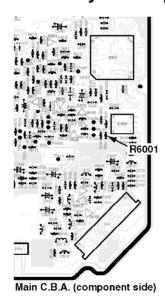

30 W.

- 4. When replacing 0  $\Omega$  resistor, a wire can be substituted for it.
- 5. IC306 replacement note:
  When replacing this IC, be sure to write the initial data with PC-EVR Adjustment Program.
- 6. IC501 and IC6001 replacement note:

IC501 and IC6001 are supplied together only as a Microcontroller Kit (LSUC0005). Microcontroller Kit consists of IC6001, IC501, and Instruction Sheet.

When replacing either IC6001 or IC501, be sure to replace both IC6001 and IC501. When R6001 is found on the Main C.B.A., be sure to remove it at the same time.

Otherwise, normal operation may not be possible.

# TROUBLESHOOTING HINTS FOR SD/MultiMediaCard Error

The following ERROR No. will be displayed on the Camcorder LCD Monitor or EVF Monitor when an Error occurred.

ERROR No.	Error Description	Possible solution	
U11	Initial processing with IC501 right after the care detection couldn't be done.	May be caused by bad contact between SD/Multi Media Card and IC501 (Camera/DSC Microcontroller.) Check following items and repair or replace if necessary. Replace Battery Catcher Unit (Ref No. 30) Replace IC501 (Camera/DSC Microcontroller) Repair contact (solder) of signal lines between IC501 and FP2 connector(Pin 2 ~ 7) on the Main C.B.A.	
U12	The mode switching of the card and initial processing can't be done.  May be caused by interruption, such as AC OFF, or removal of the SD/Multi Media Card during accessing the system area of the memory address.	The SD/Multi Media Card is defective. Use a new SD/Multi Media Card. When a defect still goes on, may be caused by bad contact between SD/Multi Media Card and IC501 (Camera/DSC Microcontroller.) Check following items and repair or replace if necessary.  Replace Battery Catcher Unit (Ref No. 30) Replace IC501 (Camera/DSC Microcontroller) Repair contact (solder) of signal lines between IC501 and FP2 connector(Pin 2 ~ 7) on the Main C.B.A.	
U13	Information from the card couldn't be acquired.  (May be caused by interruption, such as AC OFF, or removal of the SD/Multi Media Card during accessing the system area of the memory address.)	The SD/Multi Media Card is defective. Use a new SD/Multi Media Card.	
U14	Communication Error (SD/Multi Media Card <> Camcorder)	Install a new SD/Multi Media Card in the Camcorder.  Does the camcorder works OK?  OK  Caused by SD/Multi Media Card error. Format the original SD/Multi Media Card. If still NG, the original SD/ Multi Media Card is defective. Use a new one.	
U15	No SD/Multi Media Card Memory	Delete the data in the SD/Multi Media Card which was recorded by other compatible products.  OR Use a new SD/Multi Media Card.	
U16	Captured image (ctg folder) limit exceeded (Max. 215 folders)	Delete the data in the SD/Multi Media Card which was recorded by other compatible products.  OR  Use a new SD/Multi Media Card.	
U17	Captured image (JPEG file) limit exceeded (Max. 697 files)	Delete the data in the SD/Multi Media Card which was recorded by other compatible products.  OR Use a new SD/Multi Media Card.	
U30	Error other than above	May be caused by IC501 (Camera Microcontroller) malfunction. Replace IC501 on the Main C.B.A.	

Note: When the Battery Catcher Unit connector is disconnected from FP2 connector on the Main C.B.A., "NO CARD" appears on-screen. Connect the Battery Catcher Unit connector firmly.

Remove Light Protector and allow Lamp to cool before replacing to avoid possible burn hazard. NOTE 1: Battey is not supplied as a replacemet part. Purchase CR2025 battery locally if required.

## Notes in chart

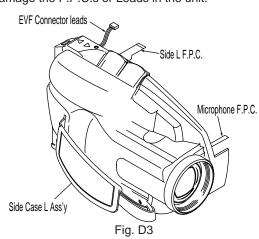

## 1. Removal of Cassette Cover and LCD Ass'y

To open the Cassette Cover, place the unit with the Cassette Cover facing upward. Then, slide the EJECT button with the power on, or remove the EVR Cover and slide the Lock Lever through TP Board slot.

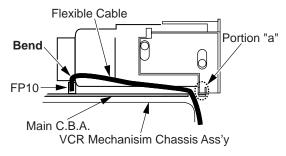

#### 2. Removal of Side Case L Ass'y

When removing the Side Case L Ass'y, take care not to damage the F.P.C.s or Leads in the unit.

## 3. Installation of Lens Ass'y

Shape the Flexible Cable between Portion "a" of Lens Ass'y and Main C.B.A. as shown.

## **Bottom View**

Fig. D4

#### 4. Installation of Main C.B.A.

- 1) Take care not to damage the Flexible Cables.
- Connect the Flexible Cables to the connectors on the Main C.B.A., verifying that the direction of the Flexible Cables is correct. Refer to "REMOVAL/INSTALLATION OF F.P.C. FROM NON ZIF (Zero Insertion Force) CONNECTOR."

#### 5. Installation of VCR Mechanism Chassis Ass'v

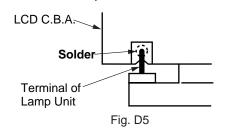

The VCR Mechanism Chassis Ass'y is supplied with a Lock Screw installed. Make sure to remove the Lock Screw from the Cassette Up Unit when replacing the VCR Mechanism Chassis Ass'y.

#### 6. Removal of LCD Case B

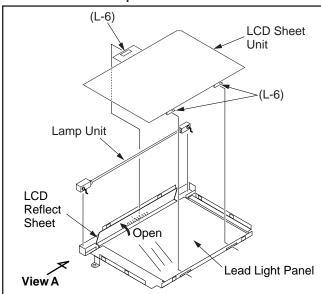

When removing the LCD Case B, pull the LCD Unit out of the slots while raising the lower portion of the LCD Unit.

## 7. Installation of Lead Light Panel Unit

After replacing the Lead Light Panel Unit, confirm that the Terminal of the Lamp Unit is soldered correctly.

## 8. Installation of Lamp Unit

- a. When installing the Lamp Unit, confirm that the Lamp Unit is positioned as shown below.
- Use extreme caution when handling the Lead Light Panel and the LCD Sheet Unit to avoid damage, dust, and spots (especially fingerprints),etc.

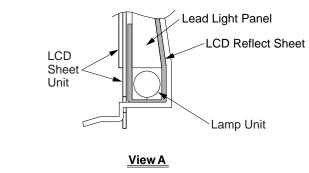

Fig. D6

#### 9. Installation of Color EVF Unit/EVF Unit

After installing, confirm that the EVF Connector Leads are set correctly on the Side L FPC Unit.

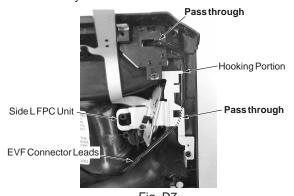

Fig. D7

#### 10. Removal of Zoom Switch on Side L FPC Unit

- 1) Remove the 3 Screws (586).
- Remove the Zoom Switch on Side L FPC Unit after releasing the 2 Locking Tabs (L-1).

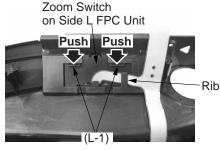

Fig. D8-1

# Removal/Installation of Side L FPC Unit CAUTION:

The Side L FPC Unit may be damaged if it is installed in order than Camera mode.

Be sure to set to Camera mode before installing.

When installing the Side L FPC Unit, be sure to set the VCR/Camera/Photo SW. to Camera mode:

(To do this, turn the VCR/Camera/Photo switch on the Side L FPC Unit in the direction of the arrow as far as possible (VCR mode). Then, turn the VCR/Camera/Photo switch through two clicks to Camera mode as shown.)

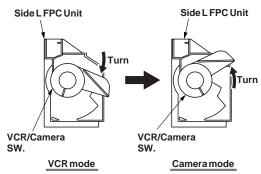

Fig. D8-2

#### 11. Removal/Installation of LCD Panel

When disassembling or reassembling the Color EVF Unit, make sure that no dust gets into the Color EVF Unit.

 Use extreme care when handling the LCD Panel to avoid damage, dust, and spots (especially fingerprints), etc.

# 12. Removal of CCD C.B.A., Filter Rubber, Optical Filter, IR Cut Filter

#### **CAUTION:**

- 1) When removing the CCD C.B.A., take care that the Optical Filter and the IR Cut Filter do not fall out.
- Take extreme caution when removing the CCD C.B.A. because it is easily damaged by static electricity. Use a Wrist Strap while removing and installing.
- 3) Do not touch the CCD window surface.

# Installation of CCD C.B.A., Filter Rubber, Optical Filter, IR Cut Filter

- Install the IR Cut Filter in the Lens Unit correctly.
   Note: Make sure no dust gets on the IR Cut Filter or in the Lens Unit. Clean the IR Cut Filter with lens cleaning paper dampened with lens cleaner if necessary.
- Install the Optical Filter on the IR Cut Filter correctly.
   Note: Make sure no dust gets on the Optical Filter or in the Lens Unit. Clean the Optical Filter with lens cleaning paper dampened with lens cleaner if necessary.
- 3) Install the Filter Rubber on the Optical Filter correctly as shown below.

**Note:** Make sure that no dust gets on the Filter Rubber.

4) Install the CCD C.B.A. in the Lens Unit. Then, secure the 2 Screws (502) while keeping the CCD C.B.A. pressed toward the upper right corner.

**Note:** Do not touch the Lens Surface. Clean the surface with lens cleaning paper dampened with lens cleaner if necessary.

#### 13. Installation of Zoom Motor Unit

Install the Zoom Motor Unit so that the Shaft of the Zoom Motor Unit is set in the Holder. Then, tighten the 2 Screws (501).

#### 14. Installation of Top Operation Unit

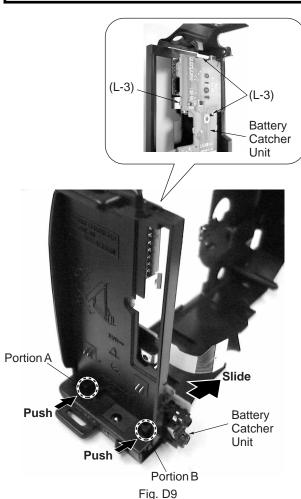

- 1) Install the Top Operation Unit to the Side Case R Unit while setting the Locking Tab (L-2).
- 2) Then, secure the 2 Locking Tabs (L-1).

#### 15. Installation of Battery Catcher Unit

- To remove the Battery Catcher Unit, first remove the Backup Cover (29) with the Battery.
- 2) Remove the 2 Screws (533, 586).
- 3) Release the 3 Locking Tabs (L-3). Then, slide the Battery Catcher Unit out by pushing Portions A and B as indicated by the arrow.

#### WARNING:

DANGER OF EXPLOSION IF BATTERY IS INCORRECTLY REPLACED. REPLACE ONLY WITH THE SAME OR EQUIVALENT TYPE.

## 16. Replacement of Lamp

When replacing the Lamp, refer to "HOW TO REPLACE THE LAMP" in "SERVICE NOTES."

## **DANGER:**

Use only replacement Lamp (PART NO. VLLW0015) supplied by Panasonic to reduce risk of fire.

Handle new Lamp with cloth or tissue as skin oils will decrease Lamp life.

Remove Light Protector and allow Lamp to cool before replacing to avoid possible burn hazard.

## 17. Installation of Operation Plate

Before installing the Operation Plate, be sure to bend the Tabs straightly. Then, install in that condition.

# **Things You Should Know**

## Safety Precautions

## WARNING: TO PREVENT FIRE OR SHOCK HAZARD, DO NOT EXPOSE THIS EQUIPMENT TO RAIN OR MOISTURE.

Your Compact VHS Camcorder is designed to record and play back in Standard Play (SP) and Super Long Play (SLP) modes. You can also play a Compact VHS Camcorder recording on your VHS VCR using the supplied VHS PlayPak.

This Camcorder is equipped with the HQ System to provide excellent video pictures, and is compatible with standard VHS equipment.

It is recommended that only cassette tapes that have been tested and inspected for use in VCR machines with the WHSIE and/or WHSI mark be used.

EFER SERVICING TO QUALIFIED SERVICE PERSONNE

This symbol warns the user that uninsulated voltage within the unit may have sufficient magnitude to cause electric shock. Therefore, it is dangerous to make any kind of contact with any inside part of this unit.

This symbol alerts the user that important literature concerning the operation and maintenance of this unit has been included. Therefore, it should be read carefully in order to avoid any problems.

#### The above markings are located on the appliance's bottom cover.

**Declaration of Conformity** 

Model Number : PV-L452/PV-L652

Trade Name : Panasonic

Responsibility Party: Matsushita Electric Corporation of America

Address : One Panasonic Way Secaucus New Jersey 07094

Telephone Number: 1-800-211-PANA(7262)

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Warning: To assure continued FCC compliance, the user must use only provided shielded interfacing cable with ferrite cores when connecting to computer. Also, any unauthorized changes or modifications to this equipment would void the users authority to operate.

Note: This equipment has been tested and found to comply with Part 15 and part 18 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when operated in a residential environment.

If this equipment does cause interference to radio or television reception, which can be determined by turning the equipment off and on, use the equipment in another location and/or utilize an electrical outlet different from that used by the receiver.

If necessary, consult the dealer or an experienced radio/TV technician for help. You may find the booklet, 'Something About Interference' available from FCC local regional offices helpful.

This product may cause interference to radio equipment and should not be installed near maritime safety communications equipment or other critical navigation or communication equipment operating between 0.45-30 MHz.

# **Important Safeguards**

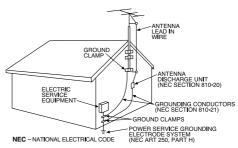

- Read Instructions All the safety and operating instructions should be read before the unit is operated.
- Retain Instructions The safety and operating instructions should be retained for future reference.
- Heed Warnings All warnings on the unit and in the operating instructions should be adhered to.
- **4.** Follow Instructions All operating and maintenance instructions should be followed.
- Cleaning Unplug this video unit from the wall outlet before cleaning. Do not use liquid or aerosol cleaners. Use a dry cloth for cleaning.
- Attachments Do not use attachments not recommended by the video product manufacturer as they may be hazardous.
- Water and Moisture Do not use this video unit near water – for example near a bath tub, wash bowl, kitchen sink, or laundry tub, in a wet basement, or near a swimming pool, and the like.
- 8. Accessories Do not place this video unit on an unstable cart, stand, tripod, bracket, or table. The video unit may fall, causing serious injury to a child or adult, and serious damage to the unit. Use only with a cart, stand, tripod, bracket, or table recommended by the manufacturer, or sold with the video unit. Any mounting of the unit should follow the manufacturer's instructions and should use a mounting accessory recommended by the manufacturer. An appliance and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the
- 9. Ventilation Slots and openings in the cabinet are provided for ventilation and to ensure reliable operation of the video unit and to protect it from overheating. These openings must not be blocked or covered. Never place the video unit on a bed, sofa, rug, or other similar surface, or near or over a radiator or heat register. This video unit should not be placed in a built-in installation such as a bookcase or rack unless proper ventilation is provided or the manufacturer's instructions have been adhered to.

appliance and cart combination

to overturn.

10. Power Sources – This video unit should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply to your home, consult your appliance dealer or local power company. For video units intended to be operated from battery power, or other sources, refer to the operating instructions.

- 11. Grounding or Polarization This video unit may be equipped with either a polarized 2-wire AC (Alternating Current) line plug (a plug having one blade wider than the other) or 3-wire grounding type plug, a plug having a third (grounding) pin.
  - The 2-wire polarized plug will fit into the power outlet only one way. This is a safety feature. If you are unable to insert the plug fully into the outlet, try reversing the plug. If the plug still fails to fit, contact your electrician to replace your obsolete outlet. Do not defeat the safety purpose of the polarized plug.
  - The 3-wire grounding type plug will fit into a grounding type power outlet. This is a safety feature. If you are unable to insert the plug into the outlet, contact your electrician to replace your obsolete outlet. Do not defeat the safety purpose of the grounding type plug.
- 12. Power-Cord Protection Power-supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them. Paying particular attention to cords of plugs, convenience receptacles, and the point where they exit from the unit.
- 13. Outdoor Antenna Grounding If an outside antenna or cable system is connected to the video unit, be sure the antenna or cable system is grounded so as to provide some protection against voltage surges and built-up static charges. Part 1 of the Canadian Electrical Code, in USA Section 810 of the National Electrical Code, provides information with respect to proper grounding of the mast and supporting structure, grounding of the lead-in wire to an antenna discharge unit, size of grounding conductors, location of antenna discharge unit, connection to grounding electrodes, and requirements for the grounding electrode.

14. Lightning – For added protection of this video unit receiver during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the antenna or cable system. This will prevent damage to the video unit due to lightning and power-line surges.

# **Important Safeguards**

- 15. Power Lines An outside antenna system should not be located in the vicinity of overhead power lines or other electric light or power circuits, or where it can fall into such power lines or circuits. When installing an outside antenna system, extreme care should be taken to keep from touching such power lines or circuits as contact with them might be fatal.
- 16. Overloading Do not overload wall outlets and extension cords as this can result in a risk of fire or electric shock.
- 17. Objects and Liquids Never push objects of any kind into this video unit through openings as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind onto the video unit.
- 18. Servicing Do not attempt to service this video unit yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.
- 19. Damage Requiring Service Unplug this video unit from the wall outlet and refer servicing to qualified service personnel under the following conditions:
  - a. When the power-supply cord or plug is damaged.

- b. If any liquid has been spilled into, or objects have fallen onto, the video unit.
- c. If the video unit has been exposed to rain or water.
- d. If the video unit does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions, as an improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the video unit to its normal operation.
- e. If the video unit has been dropped or the cabinet has been damaged.
- f. When the video unit exhibits a distinct change in performance – this indicates a need for service.
- 20. Replacement Parts When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer or have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock or other hazards.
- Safety Check Upon completion of any service or repairs to this video unit, ask the service technician to perform safety checks to determine that the video unit is in safe operating order.

## **Precautions**

## **USE & LOCATION**

- TO AVOID SHOCK HAZARD ... Your Camcorder and power supply should not be exposed to rain or moisture. Do not connect the power supply or operate your Camcorder if it gets wet. Your Camcorder has been designed for outdoor use, however it is not designed to sustain direct exposure to water, rain, sleet, snow, sand, dust, or a direct splashing from a pool or even a cup of coffee. This action could permanently damage the internal parts of your Camcorder. Do not attempt to disassemble this unit. There are no user serviceable parts inside. Unplug your Camcorder from the power supply before cleaning.
- DO NOT AIM YOUR CAMCORDER AT THE SUN OR OTHER BRIGHT OBJECTS.
- DO NOT LEAVE THE CAMCORDER WITH THE EVF AIMED DIRECTLY AT THE SUN AS THIS MAY CAUSE DAMAGE TO THE INTERNAL PARTS OF THE EVF.
- DO NOT EXPOSE YOUR CAMCORDER TO EXTENDED HIGH TEMPERATURE ... Such as, in direct sunlight, inside a closed car, next to a heater, etc... This action could permanently damage the internal parts of your Camcorder.
- AVOID SUDDEN CHANGES IN TEMPERATURE ... If the unit is suddenly moved from a cold place to a warm place, moisture may form on the tape and inside the unit.
- DO NOT LEAVE YOUR CAMCORDER OR THE POWER SUPPLY TURNED ON WHEN NOT IN USE.
- STORAGE OF YOUR CAMCORDER ... Store and handle your Camcorder in a manner that will not subject it to
  unnecessary movement (avoid shaking and striking). Your Camcorder contains a sensitive pick-up device which
  could be damaged by improper handling or storage.

#### CARE

- TO CLEAN YOUR CAMCORDER ... Do not use strong or abrasive detergents when cleaning your Camcorder body.
- TO PROTECT THE LENS ... Do not touch the surface of the lens with your hand. Use a commercial camcorder lens solution and lens paper when cleaning the lens. Improper cleaning can scratch the lens coating.
- TO PROTECT THE FINISH OF YOUR CAMCORDER ... Before handling your Camcorder, make sure your hands and face are free from any chemical products, such as suntan lotion, as it may damage the finish.

# **Self Demo Mode**

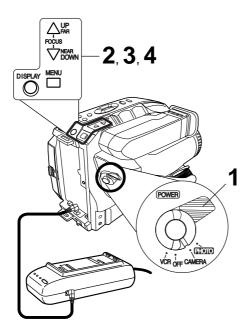

Self Demo mode is on when the screen below appears. To turn it off, follow steps 1-4 below.

## **EVF or LCD Monitor**

## **Panasonic**

ITS TAPES CAN PLAY IN YOUR VCR YES, IT'S VHSI

20x LENS / 800x D.ZOOM DIGITAL STABILIZATION FULL-SIZE HEAD SYSTEM DIGITAL PHOTOSHOT

## Before you begin...

• Connect Camcorder to power source.

Set POWER to CAMERA.

Press MENU for MENU mode.
Press UP or DOWN to select
SELF DEMO.

3 Press <u>DISPLAY</u> to select OFF.

4 Press MENU to exit.

## Note:

- Self Demo stops automatically if battery is attached (page 9) and cassette tape is inserted (page 11).
- Inserting a tape alone (or attaching a partially charged battery) only temporarily stops Self Demo.
- Self Demo stops for 30 seconds when the Light is pressed.

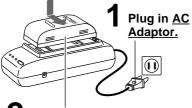

## To turn Self Demo back on:

• Set to SELF DEMO : ON in MENU screen.

# **Quick Operation Guide**

## Charging the Battery Pack

Charge Battery Pack fully before operation (page 9).

Insert <u>Battery</u>. CHARGE Lamp flashes, then stays lit when charging is complete.

# Attach fully charged Battery (page 9). 2 Slide TAPE EJECT to open door. 3 Insert cassette (page 11). 4 Press here to close door.

Note:
• Remove the Protection Film before use.

## **Camera Recording**

When the LCD monitor is open, the EVF automatically turns OFF (Color EVF model only) (page 17).

Press LCD-OPEN to unlock the LCD monitor.
Swing it fully open and adjust the angle.

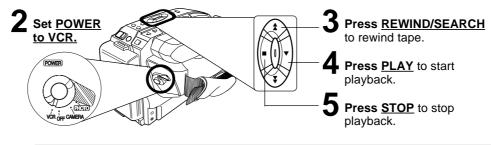

2 Set POWER to CAMERA.

3 Press RECORD/PAUSE to start recording.
Press RECORD/PAUSE again to pause recording.

## Playback using the LCD Monitor

When the LCD monitor is open, the EVF automatically turns OFF (Color EVF model only) (page 20).

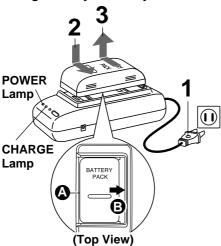

Press <u>LCD-OPEN</u> to unlock the LCD monitor. Swing it fully open and adjust the angle (see above).

# **Supplying Power**

## Charging the Battery Pack

Charge Battery Pack fully before use

Plug in AC Adaptor. POWER Lamp lights.

- Insert Battery.

  A Align left side of Battery with left edge of
  - Press Battery down and slide in direction of arrow.

The CHARGE Lamp flashes, then stays lit when charging is complete.

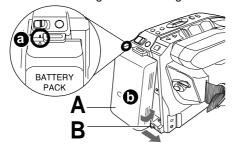

Remove Battery. Slide Battery to the left and lift off.

#### Note:

- Charging takes about 1 and 1/2 hours.
- While the DC Power Cable (supplied) is connected to the AC Adaptor, the Battery cannot be charged.
- After charging 5 times, use Battery Refresh feature as explained below.
- Battery life gradually decreases after repeated use and recharging. If operation time becomes very short even after a sufficient charge, discard Battery properly (page 10).

## **Using the Battery Pack**

A fully charged Battery provides a maximum of about 2 hours of continuous use (LCD monitor off) or about 1.5 hours (LCD monitor on). Actual time may vary due to operating conditions. Using the Built-in Light decreases operating time.

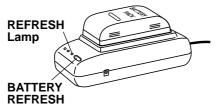

## Attach Battery.

- a Insert top of Battery into top of mounting
- **b** Press and snap into place.

## **Battery Refresh**

This feature completely discharges Battery before recharging begins. Use after every 5 charges for optimum Battery performance.

## Remove Battery.

Slide **BATTERY RELEASE** and remove Battery.

#### To use battery refresh, insert Battery on AC Adaptor (see steps 1~2 above), then press BATTERY REFRESH.

The REFRESH Lamp lights, then goes out when discharge is complete. Battery charging will then start automatically.

If <u>BATTERY REFRESH</u> is pressed by mistake, remove Battery from AC Adaptor and reinsert it for normal charging.

- Charging takes about 7 and 1/2 hours when Battery Refresh is used.
- · Battery will not operate in extremely high temperatures.

# **Supplying Power**

## **Battery Care**

#### Caution:

· Charge only with specified charger.

Battery can be charged within a temperature range of 10 °C (50 °F) and 35 °C (95 °F).

Battery is normally warm after charging or just after use.
Do not use an insufficiently charged or worn-out Battery.

## Safety precautions:

Do not get Battery near, or dispose of in, fire.
Do not directly connect (short circuit) the positive (+) and negative (–) terminals.

Never attempt to disassemble or reassemble Battery.

#### To avoid Battery damage:

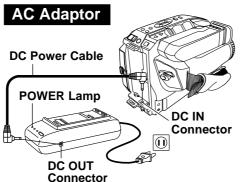

Do not drop or jar Battery.
Use Battery with specified units only.

 If Battery is used in extremely high temperatures, a safety device will automatically prevent operation.

## To prolong Battery life:

 While not in use, remove Battery from the Camcorder and AC Adaptor, and store in a cool, dark, dry place.

• Keep Battery terminals clean.

Connect AC Adaptor DC OUT to Camcorder DC IN with supplied DC Power Cable.

Plug in AC Adaptor. POWER Lamp lights.

#### Note:

 While the DC Power Cable (supplied) is connected to the AC Adaptor, the Battery cannot be charged.

 When not in use, unplug AC Adaptor from AC outlet. (Adaptor uses 1.2 W of electricity while plugged in.)

## CAUTION:

This unit will operate on 110/120/220/240 V AC 50/60 Hz. An AC plug adaptor may be required for voltages other than 120 V AC. Please contact either a local or foreign electrical parts distributor for assistance in selecting an alternate AC plug. We recommend using the accessory power plug adaptor (VJSS0070) in an area which has special AC outlets.

#### Car Battery Cord (Optional)

Connect PV-C16 <u>Car Battery Cord</u> (optional) to <u>Camcorder DC IN</u>.

(A) Start engine first.

**B** Plug Car Battery Cord into Cigarette lighter socket.

 If Car Battery cord fuse needs replacing, use exact current rating (in amps).

## Note:

• This cord only works in vehicles equipped with **DC 12 V (negative ground)** battery. Check with your car/truck dealer. Use only specified car battery cord.

 To avoid blowing the car battery cord fuse, do step 2 in the proper order.

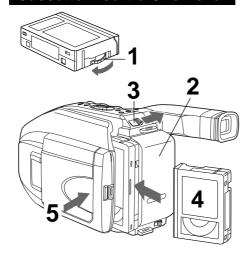

Running vehicles must be well ventilated.

• When not in use, disconnect cigarette lighter plug.

• For personal safety the driver of the vehicle should not attempt to operate the camcorder while driving.

# **Cassette Information**

## Cassette Insertion/Removal

- Turn <u>Tape Wheel</u> in direction of arrow until there is no slack.
- **2** Attach <u>Battery</u> (page 9).
- 3 Slide <u>TAPE EJECT</u> to open door.
- 4 Insert <u>cassette</u> as shown.
- **5** Press here to close door.
- To remove the cassette, slide the <u>TAPE</u> <u>EJECT</u> switch.

## Record/Playback Time

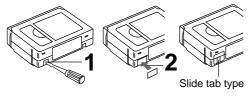

Use tapes with the **VHSE** mark in this unit.

Tape Speed Selector Position	Cassette type		
	TC-20	TC-30	TC-40
SP (Standard Play)	20 minutes	30 minutes	40 minutes
SLP (Super Long Play)	1 hour	1 hour 30 minutes	2 hours

• SLP playback may contain more picture noise.

## Erase Protection Tab

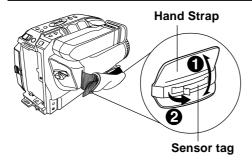

Protects tapes from being accidentally erased.

- To prevent accidental erasing, break off tab with screwdriver. (Or, slide tab open.)
- To record again, cover hole with adhesive tape. (Or, slide tab closed.)

# **Before Using**

## How to remove the Sensor tag (PV-L452 only)

- Open the Hand Strap as illustrated at left.
- Remove the Sensor tag. Then, replace the Hand Strap.

## **Attaching Shoulder Strap**

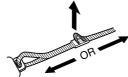

Remove Battery Pack before doing steps.

Undo strap ends from buckles.

Thread strap ends through Strap Rings on Camcorder.

Pull a loop of strap from buckle, then pull strap tight to shorten or lengthen.

Re-insert the strap ends into buckles

min. 25.4 mm (1 inch)

**Hand Strap** 

Adjust Hand Strap length to fit your hand as

## **Lens Cap**

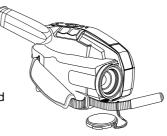

Attaching the Lens Cap

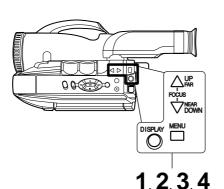

Thread the Strap through the Lens Cap attachment ring as illustrated at left.

Attaching the Lens Cap Cord to the Hand Strap: Remove the Hand Strap from the front clasp and thread the Strap through the loop in the Lens Cap Cord.

Reattach the Hand Strap.

# **Using MENU Mode**

## Before you begin...

- Connect Camcorder to power source.
- Set POWER to CAMERA or VCR.

Press <u>MENU</u> for MENU mode.
The CAMERA or VCR MENU screen (see below left) appears when Menu mode is entered.

Press <u>UP</u> or <u>DOWN</u> to highlight the desired menu item.

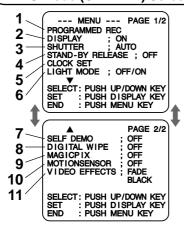

Press **DISPLAY** to set selection.

Press MENU to exit.

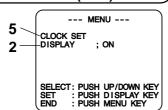

#### Note:

- The Menu mode is canceled if <u>UP/DOWN</u>, <u>DISPLAY</u>, or <u>MENU</u> are not pressed within 5 minutes when Self Demo mode is off.
- The Menu mode is canceled if <u>UP/DOWN</u>, <u>DISPLAY</u>, or <u>MENU</u> are not pressed within 30 seconds when Self Demo mode is on.

## MENU Mode (CAMERA) Screen

## (MENU Mode (VCR) Screen

- PROGRAMMED REC (page 19).
   Camcorder starts and stops recording at a preset time.
- 2 DISPLAY (page 46).
  ON: On-screen Display (OSD) screens are displayed.
- **3** SHUTTER (page 26). Select desired shutter speed.
- 4 STAND-BY RELEASE (page 18).
  ON: Enables quick resumption of recording from Stand-by mode.
- 5 CLOCK SET (pages 14, 15). Select to set clock.
- 6 LIGHT MODE (page 16). ON/OFF: Light can be set ON or OFF. ON/OFF/AUTO: Light can be set ON, OFF, or AUTO.
- 7 SELF DEMO (page 7). ON: SELF DEMO screen is displayed.
- **8 DIGITAL WIPE** (pages 39, 40). ON: Digital wipe mode can be used.
- 9 MAGICPIX (page 24). ON: Picture sensitivity is increased.
- 10 MOTIONSENSOR (page 33). ON: Enables MotionSensor recording.
- 11 VIDEO EFFECTS (pages 27~29).

  AUTO FADE : BLACK or WHITE

  DIGITAL FADE : TYPE → 7 types

  COLOR → 8 colors

  DIGITAL FILTER : COLOR → 5 colors

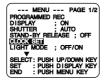

# **Setting the Clock**

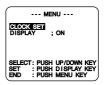

Set the following items in order: Time Zone, Daylight Saving Time, Date, and Time.

## Before you begin...

- Connect Camcorder to power source.
- Set POWER to CAMERA or VCR.

[CAMERA MODE]

[VCR MODE]

Press DISPLAY for CLOCK SET menu. Press UP or DOWN to select TIME ZONE, DST, or DATE/TIME.

Press **DISPLAY** for menu of item selected in

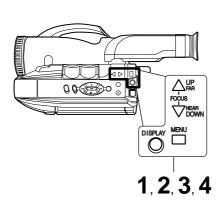

To change the setting:

TIME ZONE → Go to step 3a on page 15.

→ Go to step 3b on page 15.

DATE/TIME → Go to step 3c on page 15.

Press MENU twice to exit.

# **Setting the Clock**

# 3a Setting the Time Zone

The Camcorder is preset to Eastern time.

[ Time Zone chart ]

ALASKA MOUNTAIN

CENTRAL EASTERN SAMOA

PACIFIC STLANTIC

SAMOA

6:00 7:00 8:00 9:00 10:00 11:00 12:00 1:00 2:00

Press <u>UP</u> or <u>DOWN</u> to select local time zone. Press <u>DISPLAY</u> to confirm entry.

 When traveling, repeat this operation and select one of the 8 listed time zones to set the clock to local time.

#### Note:

- Clock may lose or gain up to 2 minutes per month.
- When traveling outside the listed time zones, set clock to local time manually.
- To adjust or set clock, see "Setting Date and Time" bottom of page.

# 3 Auto Daylight Saving Time

Clock will auto-adjust to daylight saving time (DST).

The Camcorder is preset to DST: AUTO. If DST is not observed in your area, set to OFF by doing the following.

Press <u>UP</u> or <u>DOWN</u> to select OFF or AUTO. Press <u>DISPLAY</u> to confirm entry.

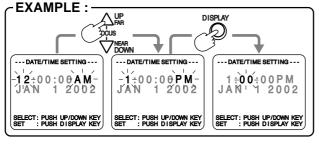

#### Note:

 Auto DST does not function if time zone is set to Hawaii or Samoa (see "Setting the Time Zone" above).

## **3c** Setting Date and Time

Date and time including leap year are calculated up to DEC 31, 2099.

Press or hold down <u>UP</u> or <u>DOWN</u> to select hour, then press <u>DISPLAY</u> to fix.

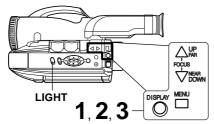

Repeat for minute, month, day, and year.

Clock starts when year is entered and **DISPLAY** is pressed.

# **Built-in Auto Light**

## **Using the Light**

For recording in dim lighting.

CAUTION: Light becomes hot. Never cover Light while on.

#### Note:

- Using Light reduces battery operating time.
- Provide proper ventilation when using Light extensively in a hot environment.
- Using Light when the Camcorder is powered by a car battery may shorten bulb life.
- Set Light to OFF when not in use.

Replacing the Bulb

## Before you begin...

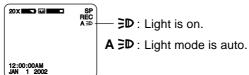

- Connect Camcorder to power source.
   Set POWER to CAMERA.

Press MENU for MENU mode. Press UP or DOWN to select LIGHT MODE

- Press <u>DISPLAY</u> to set OFF/ON or OFF/ON/AUTO. Press <u>MENU</u> to exit.
- Press LIGHT repeatedly for Light ON, OFF, or AUTO.
  - In AUTO, light turns itself on/off according to lighting conditions.

## **EVF or LCD Monitor**

## Before you begin...

- Order Part No. VLLW0015 for replacement bulb.
- Set POWER to OFF.
- Slightly raise portion (A) of lens cover to unhook, and slide portion B forward to remove.
- Using Tweezers or needle-nose pliers, carefully remove bulb.
  - · Take unit to service center if you need assistance.
- Replace bulb using a clean cloth or tissue. (Do not touch with fingers.)
- Replace lens cover.

## Note:

 Handle bulb gently. Excessive force may cause bulb to crack.

## DANGER:

Use only replacement bulb (PART NO. VLLW0015) supplied by Panasonic to reduce risk of fire.

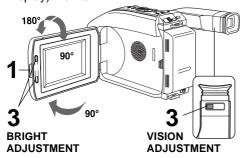

Handle new bulb with cloth or tissue as skin oils will decrease bulb life.

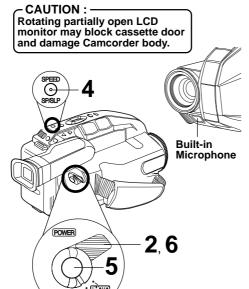

Remove lens cover and allow bulb to cool before replacing to avoid possible burn hazard.

# **Camera Recording**

# Recording via EVF or LCD Monitor

View recording scene on EVF (Electronic Viewer Finder) or LCD (Liquid Crystal Display) monitor.

## WARNING (PV-L652 only):

VCR OFF CAMERA

 Do not leave the camcorder with the EVF aimed directly at the sun. This may cause damage to the internal parts of the EVF.

#### Note:

- When Camcorder is aimed at excessively bright objects, or bright lights, a vertical bar may appear in the picture. This is normal for the CCD pick-up. Try to avoid this when possible.
- Using LCD monitor reduces battery operation time. Return LCD monitor to locked position when not in use.

## Before you begin...

- Connect Camcorder to power source.
- Insert cassette with record tab (page 11).
- Press <u>LCD-OPEN</u> to unlock the LCD monitor. Swing LCD monitor fully open and adjust viewing angle.
  - If you want to record using EVF, close and lock LCD monitor.
- 2 Set POWER to CAMERA.
  - Be sure POWER is fully turned to CAMERA position.

CAMERA position.

• EVF or LCD monitor

EVF or LCD Monitor (Record/Pause mode)

- turns on/off by the POWER switch.

   EVF shuts off when LCD monitor is
- EVF shuts off when LCD monitor is opened and turns back on when LCD is closed (Color EVF model only).
- Both EVF and LCD monitor turn on when LCD is at 180° (see above left).
   This allows both you and the subject to view the recording.
- 3 LCD: Press BRIGHT ADJUSTMENT to adjust LCD

to adjust LCD monitor brightness level.

EVF: Look into EVF and adjust VISION ADJUSTMENT to your eyesight.

- 4 Hold down <u>TAPE SPEED</u> for about 1 second to change tape speed to SP/SLP (page 11).
  Tape speed
- Press <u>RECORD/</u> <u>PAUSE</u> to start or pause recording.

RECORD

OFF when finished.

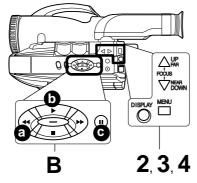

EVF or LCD Monitor (Record mode)

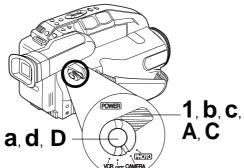

• To remove the cassette, slide the TAPE EJECT switch (page 11).

# **Camera Recording**

## Before you begin...

- Connect Camcorder to power source.
- · Insert cassette with record tab (page 11).

## Stand-by Quick Release

If left in RECORD/PAUSE mode for 5 minutes, Camcorder switches to Stand-by mode to conserve battery. When set to ON, Stand-by Quick Release lets you resume recording by pressing RECORD/PAUSE two times. Stand-by Quick Release is set to OFF at the factory.

Set POWER to CAMERA.

Press MENU for MENU mode. Press <u>UP</u> or <u>DOWN</u> --- MENU --- PAGE 1/2
PROGRAMMED REC
DISPLAY ; ON R ; ĂUTO YMI:=UZ:SEE ; OFF MODE ; OFF/ON

to select STAND-BY RELEASE

• Press <u>DISPLAY</u> to select ON/OFF.

**ON**: From Stand-by mode, press RECORD/PAUSE two times to resume recording.

OFF: From Stand-by mode, set POWER to OFF, then to CAMERA. Press RECORD/ PAUSE to record.

Press MENU to exit.

## Manual Easy Editing

For proper continuity when taping from Stop mode or after attaching a new Battery.

A Set POWER to VCR.

Press <u>REWIND/SEARCH</u> to rewind a few seconds of tape.

**Deliver** Press PLAY to review recording.

@Press STILL where you want to continue recording.

Set <u>POWER to CAMERA</u>.

Press RECORD/PAUSE to resume recording.

## **Easy Edit Stand-by**

For a smooth transition between scenes if recording is stopped, and then started within 24 hours.

Press RECORD/PAUSE to stop recording.

Set POWER to OFF and leave cassette in Camcorder.

To resume recording, set POWER to CAMERA.

Press RECORD/PAUSE to resume recording.

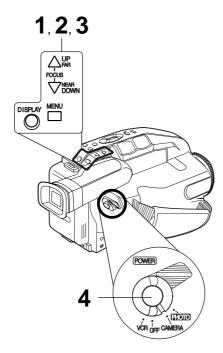

## Note:

• Use Manual Easy Edit (left) if more than 24 hours before recording is resumed.

## **Camera Recording**

#### **Programmed Recording**

Set a recording start and stop time. Or, set a 5 or 10 second interval recording to be done each minute.

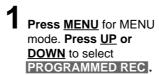

- \*1 Record 5 seconds each minute.
- \*2 Record 10 seconds each minute.

#### Before you begin...

- Connect Camcorder to power source.
   Use AC Adaptor for longer recordings.
- Insert cassette with record tab (page 11).
- Set POWER to CAMERA.

2 Press <u>DISPLAY</u>.

(Current time is displayed.)

Each additional press

of <u>DISPLAY</u> increases start time by 30 minutes.

STATE : 10: 20PM RECTIME : 10MIN.

SELECT: PUSH UP/DOWN KEY
SETT: PUSH DISPLAY KEY
STATT: PUSH RECORD KEY
CANCEL: PUSH MENU KEY
10:20:00PM

Press <u>DOWN</u> to select <u>REC TIME</u>.

Press <u>DISPLAY</u>

repeatedly to select one of the options shown at left.

To cancel the setup, press **MENU** twice.

4 Press <u>RECORD/PAUSE</u> to place Camcorder in stand-by mode.

Recording will be done as scheduled.

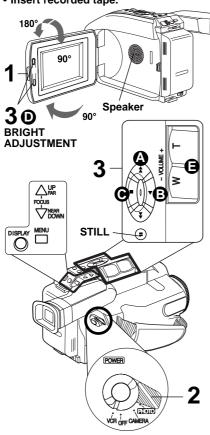

#### Note:

- Start time may not be set over 24 hours from current time.
- Camcorder shuts off at tape end, or 12 hours after Interval Recording starts.
- To cancel, set POWER to OFF.

## **Playing Back Recordings**

#### Before you begin...

- Connect Camcorder to power source.
- Insert recorded tape.

#### Tracking Control

#### **Auto Tracking**

Continuously analyzes each recording for optimum picture quality.

#### Manual Tracking

Some recordings require manual adjustment to reduce noise.

Press UP or DOWN until Playback picture clears up

Press **DISPLAY** to return to Auto Tracking.

#### Playback on EVF or LCD Monitor

Press LCD-OPEN and swing LCD monitor fully open.

• If you want to playback on EVF, close and lock LCD monitor.

#### Set POWER to VCR.

- · If tape has no record tab, auto playback begins.
- EVF or LCD monitor turns on/off by the POWER switch.
- EVF shuts off when LCD monitor is opened and turns back on when LCD is closed (Color EVF model only).
- Playback function buttons.

<u> REW</u> : Rewind tape. : Play tape. **OSTOP** : Stop tape.

**D**BRIGHT: Adjust LCD monitor brightness. **DVOLUME**: During playback, adjust

volume of speaker.

Press "T" : Volume up (+). Press "W": Volume

#### Note:

Using LCD monitor reduces battery operating time. Return LCD monitor to locked position when not in use.

down (-).

#### **Special Effects**

#### **Quick Visual Search**

#### Search Speed

 SP (Standard Play) : 3 times normal. • SLP (Super Long Play) : 9 times normal.

#### During playback, press:

• <u>FF</u> : fast forward search • <u>REW</u> : rewind search

Press again or press PLAY for normal play.

#### Still Picture

Press STILL to freeze picture.

Press again for normal play

This feature works best in SLP mode (page 11).

#### Note:

- During search, horizontal noise bars will appear. Audio is muted.
- To protect video heads and tape, operating modes will revert as follows after 5 minutes:

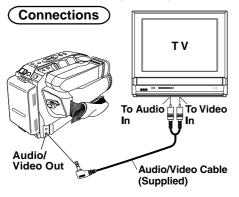

Still → Stand-by
Stand-by → Power off (when Battery Pack is

used).
• Tape auto-rewinds if played or fast forwarded to end.

## **Playing Back Recordings**

#### TV Playback or Viewing

Connect Camcorder to a TV to view playback or recordings in progress.

#### Before you begin...

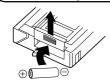

- Connect Camcorder to power source.
- Make all TV-Camcorder connections.
  - Set POWER to:

VCR → view playback.
CAMERA → view picture as it is recorded.

- Turn TV ON and set to LINE INPUT.
  See TV owner's manual.
- 3 Begin playback or recording.

#### VCR Playback using PlayPak

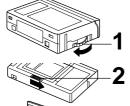

#### Load Battery in PlayPak

#### Remove Battery lid and insert AA battery.

- Do not reverse polarity.
- Replace battery when tape loading/unloading takes longer than usual.

#### Insert VHS Cassette in PlayPak

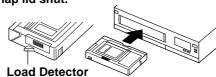

Turn WHSIE cassette Tape Wheel in direction of arrow to take up any slack.

Slide RELEASE to open cassette lid.

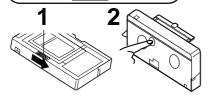

Insert the WHSTE cassette with the window up and on the left, then snap lid shut.

- Do not obstruct cassette reel while loading.
- Allow PlayPak Load
   Detector to fully retract
   before using in VHS VCR.

#### Remove VHS Cassette

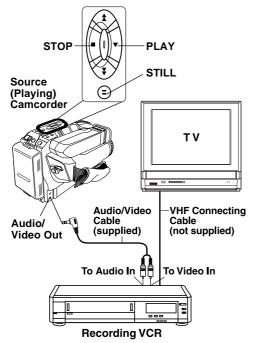

Slide RELEASE and wait for lid to open.

Push cassette out through hole in bottom of PlayPak with your finger.

## **Copying your Tapes (dubbing)**

#### **Connections**

#### Before you begin...

- Make Camcorder-VCR connections (see left).
- Turn both units on.
- Set VCR input signal to LINE. Please see VCR owner's manual.
- Set Camcorder POWER to VCR.
- Insert a pre-recorded tape into Camcorder and a blank tape with record tab into VCR.
- Press PLAY on Camcorder, then press STILL at starting point.
- Press REC, then STILL/PAUSE on VCR.
- 4 Press STILL on Camcorder and STILL/ PAUSE on VCR to start copying.
- Press STOP on both units to stop copying.

#### Note:

- Camcorder will only playback tapes recorded in SP or SLP mode.
- Dubbing may reduce picture quality.

#### CAUTION: -

Unauthorized exchanging and/or copying of copyrighted recordings may be copyright infringement.

#### **Monitor with your TV**

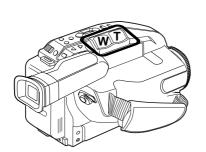

- Turn TV on and tune to VCR channel (CH3 or CH4).
- Set TV/VCR Selector on VCR to VCR.

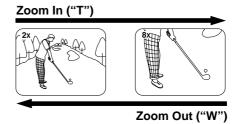

## **Four-Speed Power Zoom**

Zoom in (close up) and out (wide angle) in one of four speeds ranging from slow (16 seconds) to fast (2 seconds).

#### Before you begin...

- Connect Camcorder to power source.
- Set POWER to CAMERA.

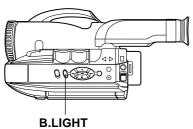

- Zoom slowly: Lightly press "T" (telephoto) or "W" (wide angle) POWER ZOOM button.
- Zoom quickly:
  Apply more pressure to the button.

## **Backlight**

Use when subject is darker than surroundings, in shadowed area, or in front of the light source.

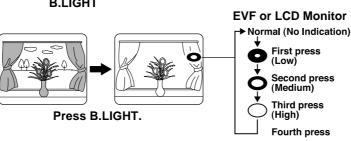

#### Before you begin...

- Connect Camcorder to power source.
- Set POWER to CAMERA.

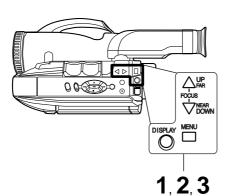

**Press B.LIGHT** while recording to select the level of backlight compensation.

In normal lighting, **press B.LIGHT** repeatedly until no indicator is displayed.

# MagicPix™ Images

Color recording of video onto a tape in low lighting.

#### Before you begin...

- Connect Camcorder to power source.
- Set POWER to CAMERA.
  - Press MENU for PAGE 2/2 MENU mode. Press <u>UP</u> or <u>DOWN</u> to select MAGICPIX
- Press <u>DISPLAY</u> to select ON.
- Press MENU to exit.

- If MagicPix is turned on, Shutter feature is
- MagicPix cannot be used with capture images on the Memory Card (page 35).
- Only Manual Focus is available.

#### Before you begin...

- Connect Camcorder to power source.
- Set POWER to CAMERA.

#### **Auto Focus**

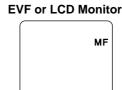

Camcorder automatically focuses on subject even during zooming.

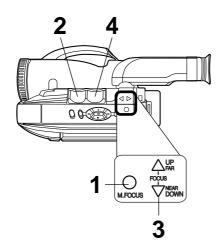

Auto Focus is on when "MF" is not displayed in EVF or LCD monitor. **Press M.FOCUS** to remove "MF" in EVF or LCD monitor if necessary.

#### **Manual Focus**

#### Use Manual Focus (MF) when:

- · recording through glass.
- lighting is poor.
- subject is far away with objects in foreground.
- subject has distinct horizontal lines.
- subject is not centered in EVF or LCD monitor.
- subject has a shiny surface.
- subject is slanted.
- subject is bright and flat, like a white wall.
- subject has fast motion, like a golf swing.

- Press <u>M.FOCUS</u> so "MF" (Manual Focus) appears in EVF or LCD monitor.
- Hold down <u>"T" (telephoto)</u> on POWER ZOOM to maximum zoom in.
- 3 Press <u>UP (FAR)</u> or <u>DOWN (NEAR)</u> until subject is in focus.
  - Back away from subject if necessary.
- 4 Hold down <u>"W" (wide angle)</u> on POWER ZOOM as desired.
- Refocus as needed when aiming at new scenes.

## Macro Focus (close-ups)

Auto Focus functions up to 12.7 mm (1/2 inch) from subject.

Hold down "<u>W</u>" on POWER ZOOM to maximum wide angle. Bring Camcorder up close to the subject.

## **High Speed Shutter**

Improves Still or Slow Motion playback picture of high speed subjects (e.g. a tennis stroke), when viewed on Camcorder or 3 or 4 head VCR.

#### Before you begin...

- Connect Camcorder to power source.
- Insert cassette with record tab (page 11).
- Set POWER to CAMERA.

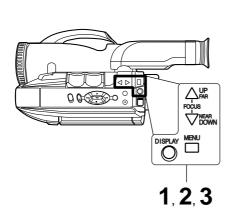

#### **Auto Shutter**

In AUTO mode (no indication in EVF or LCD Monitor), shutter speed is auto-adjusted from 1/60 to 1/350 according to subject brightness.

• AUTO mode is selected each time POWER is set to CAMERA.

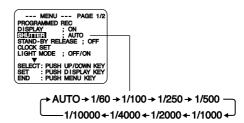

#### **Manual Selection**

The faster the shutter speed, the more light is needed for proper picture and color quality. High Speed Shutter indication flashes if light is inadequate. Provide additional light.

Press MENU for MENU mode. Press UP or DOWN to select SHUTTER.

Press **DISPLAY repeatedly** to select shutter speed.

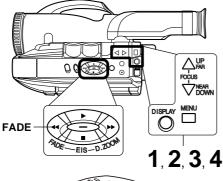

Press MENU to exit.

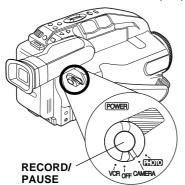

- Shutter speed cannot be set to 1/60 if Digital E.I.S. feature is set to ON.
- Provide additional halogen or tungsten light for use indoors or in poor light. Fluorescent light degrades picture.
- Auto Focus may not function properly if high speed shutter is used in inadequate light.
- Setting reverts to AUTO each time POWER is set to CAMERA.

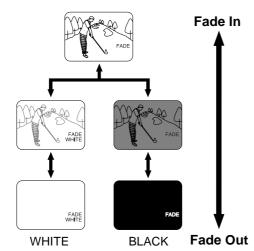

## **Auto Fade**

An interesting way to open and close scenes.

#### Before you begin...

- Connect Camcorder to power source.
- Set POWER to CAMERA.
- Press MENU for MENU mode. to select

- Press DISPLAY for **VIDEO EFFECTS** menu. Press UP or **DOWN** to select **AUTO FADE**.
  - Press **DISPLAY** for --- AUTO FADE : COLOR ---AUTO FADE: BLACK COLOR menu. WHITE **Press UP or DOWN** to select BLACK or SELECT: PUSH UP/DOWN KEY SET : PUSH DISPLAY KEY
- WHITE. Press **DISPLAY** to confirm entry. Press MENU to exit.

#### Fade In:

In RECORD/PAUSE mode, press FADE so "FADE" flashes in EVF or LCD monitor.

#### Press RECORD/PAUSE.

Recording starts as picture and sound gradually fade in.

#### Fade Out:

While recording, press FADE so "FADE" flashes in EVF or LCD monitor.

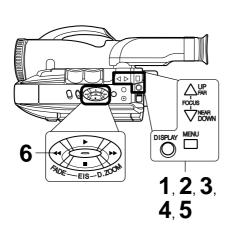

#### Press RECORD/PAUSE.

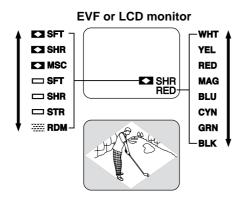

Picture and sound gradually fade out, and recording is paused.

If FADE is pressed accidentally, press again so "FADE" disappears in EVF or LCD monitor.

## **Color Digital Fade**

Choose from 7 fade effects in 8 different colors.

■ For more effects, stop fade in or fade out at any time (except RANDOM mode) by pressing <u>FADE</u>.
Then, press <u>FADE</u> to resume fade.

#### Note:

- Audio is not affected by fade.
- To cancel Digital Fade, do steps 1, 2, and 5. In step 2, select AUTO FADE.

#### Before you begin...

- Connect Camcorder to power source.
- Set POWER to CAMERA.
- Press MENU for MENU MAICPI MOTIONS VIDEO EFFECTS.

  SELECT: SEL
- Press <u>DISPLAY</u> for VIDEO EFFECTS menu. Press <u>DOWN</u> to select <u>DIGITAL FADE</u>.

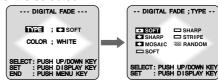

PAGE 2/2

- Press <u>DISPLAY</u> for DIGITAL FADE menu.

  Press <u>UP</u> or <u>DOWN</u> to select <u>TYPE</u>.

  Press <u>DISPLAY</u> for TYPE menu.

  Press <u>UP</u> or <u>DOWN</u> to select from 7 different types of fades.
  - A preview of each fade type is displayed as it is selected.

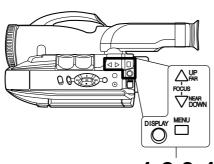

- Press <u>DISPLAY</u> for DIGITAL FADE menu.
  Press <u>DOWN</u> to select <u>COLOR</u>.
  Press <u>DISPLAY</u> for COLOR menu.
  Press <u>UP</u> or <u>DOWN</u> to select from 8 colors.
- A preview of each color is displayed as it is selected.

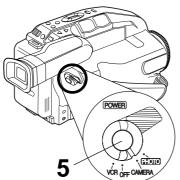

- Press <u>DISPLAY</u> to confirm entry. Press <u>MENU</u> twice to exit.
- Press <u>FADE</u> for about 2 seconds to fade out during recording (selected fade type flashes). Press <u>FADE</u> again to fade in.

## **Color Digital Filter**

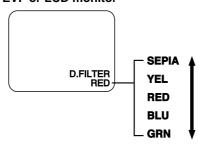

Digital Filter adds one of 5 colors to entire picture, like a color filter.

1, 2, 3, 4

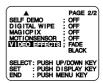

#### **EVF** or **LCD** monitor

#### Before you begin...

- Connect Camcorder to power source.
- Set POWER to CAMERA.
- Press <u>MENU</u> for MENU mode.
  Press <u>UP</u> or <u>DOWN</u> to select
  VIDEO EFFECTS.

Press <u>DISPLAY</u> for VIDEO EFFECTS menu. Press <u>DOWN</u> to select <u>DIGITAL FILTER</u>.

- **3** Press <u>DISPLAY</u> for DIGITAL FILTER menu. Press <u>UP</u> or <u>DOWN</u> to select from 5 colors.
  - A preview of each color is displayed as it is selected.

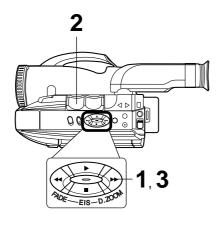

- Press <u>DISPLAY</u> to confirm entry. Press <u>MENU</u> to exit.
- **5** Start recording (page 17).
  - To cancel Digital Filter, **set** <u>POWER</u> <u>to OFF</u>.

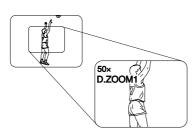

#### Note:

- Color Digital Filter will not function during Still/Strobe/Wide.
- Picture returns to normal in Still mode.

# **Digital Zoom**

Power Zoom magnification is digitally increased.

#### Before you begin...

- Connect Camcorder to power source.
- Set POWER to CAMERA.
- Set DIGITAL WIPE to OFF in menu.

## Press D. ZOOM.

once →D.ZOOM 1

(PV-L452/PV-L652: 150× maximum)

twice →D.ZOOM 2 (PV-L452: 750x maximum)

(PV-L652: 800x maximum)

The Higher digital magnification levels may cause picture distortion.

## 2 Hold down <u>"T" on POWER ZOOM.</u>

Digital Zoom starts when normal zoom reaches maximum (20x).

- Zoom level appears in EVF or LCD monitor.
- POWER ZOOM switch controls digital zoom level.
- Normal zoom resumes when level falls to 20×.
- Press D. ZOOM to turn off Digital Zoom so no indication appears.

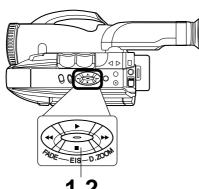

# Special Features

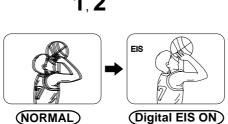

## Digital Electronic Image Stabilization (E.I.S.)

Helps stabilize picture when recording in unstable situations.

#### Before you begin...

- Connect Camcorder to power source.
- Set POWER to CAMERA.

- Press <u>EIS</u> to display "EIS" in the EVF or I CD monitor
  - Image becomes slightly enlarged and shutter speed auto-adjusts from 1/80 to 1/350 according to brightness.
  - Use High Speed Shutter (page 26) if needed. Shutter speed setting remains after EIS is canceled.
- Press EIS again to cancel when not in use

#### E.I.S. may not function during...

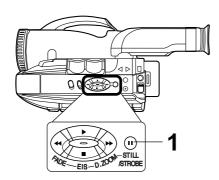

- extreme Camcorder movement.
- recording of subjects with distinct horizontal or vertical stripes.
- low light situations (EIS indicator flashes).
- intense fluorescent lighting situations.
- recording of very fast motion.

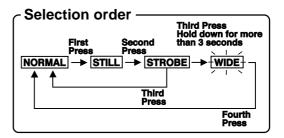

## Still/ Strobe/ Wide

#### Before you begin...

- Connect Camcorder to power source.
- Set POWER to CAMERA.
  Set DIGITAL WIPE to OFF in menu.

## Press STILL/STROBE repeatedly for desired function as described below.

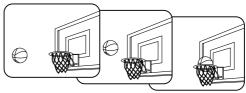

#### **STILL**

Records a still image from the current picture.

#### **STROBE**

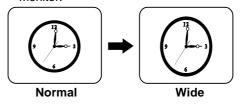

Records a progression of still images in 1/6 of a sec. intervals.

#### **WIDE SCREEN**

Records a picture that will fill entire screen of a wide screen (16×9 aspect ratio) TV.

• Picture appears distorted in EVF or LCD monitor.

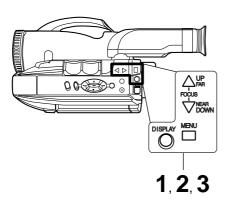

#### Note:

- Pressing STILL/STROBE with DIGITAL WIPE set to ON will display "NOW IN DIGITAL WIPE" and Still/ Strobe/Wide feature cannot be used.
- Wide screen recordings must be played back on a wide screen TV (16×9 aspect ratio) or picture will be distorted.

## **MotionSensor**

Recording starts automatically if motion is detected.

## MotionSensor may mistakenly start when:

- background is plain, like a white wall, or has distinct vertical, horizontal, or slanted stripes, like a venetian blind.
- brightness suddenly changes.

#### MotionSensor may not start when:

- motion is very slow or fast.
- moving object is very small.
- motion occurs only in 1 corner of viewing area.
- in poor lighting (in this case, MOTIONSENSOR flashes).
- background is plain, like a white wall, or has distinct horizontal or vertical stripes.

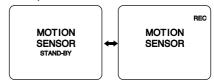

#### Before you begin...

- Connect Camcorder to power source.
   Use AC Adaptor for longer recordings.
- Insert cassette with record tab (page 11).
- Set POWER to CAMERA.
- Securely position and aim Camcorder.

Press <u>MENU</u> for MENU mode. Press <u>UP</u> or <u>DOWN</u> to select <u>MOTIONSENSOR</u>.

- 2 Press DISPLAY to select ON.
- Press <u>MENU</u> for MotionSensor stand-by mode. (If cassette is not inserted, "••" will flash.)

- Recording will start about 3 seconds after motion is detected.
- Date and time are recorded if displayed in EVF or LCD monitor (page 15).
- Recording stops about 30 seconds after motion ceases.

To cancel MotionSensor Mode, **set** <u>**POWER**</u> <u>**to OFF.**</u>

#### Note:

- MotionSensor recording starts if Camcorder is bumped or repositioned.
- This feature is not available during normal recording.
- While in MotionSensor stand-by, the following functions are not available: Record/ Pause, Stand-by mode, Digital E.I.S., Video Effects (Auto/Digital Fade, Digital Filter).

#### **Memory Card\* Insertion/ Removal**

#### Before you begin...

- · Connect Camcorder to power source.
- \*Memory Card: MultiMediaCard or SD Memory Card. Set POWER to OFF.

Captured images will be stored on the Memory Card.

Be sure to insert the Memory Card before using the Built-in Digital Still Camera. Listed below are the Memory Cards which can be used with this Camcorder.

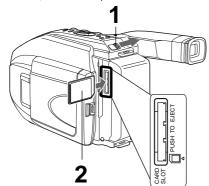

Memory Card	Capacity	
Memory Card (LSFT0262) (supplied)	8 MB	
MultiMediaCard (SanDisk brand)	8 MB, 16 MB	
SD Memory Card (optional) (See page 51.)	16 MB, 32 MB, 64 MB	

#### **SD Memory Card write protection switch**

A write protection switch is located on the SD Memory Card. Sliding the switch to the "LOCK" position prevents writing on or formatting the card.

Write protection switch

Slide TAPE EJECT to open door.

Fully insert the <u>Memory Card</u>, with the sloped corner down, into the Card Slot in the direction of the arrow. (See diagram.)

**5** Push in on the inserted Card to eject.

#### Note

- If Memory Card is not inserted, "NO CARD" appears on-screen.
- Do not insert card in wrong direction. (This would become the basis for trouble.)
- If "CARD ERROR" appears on-screen, see page 56.

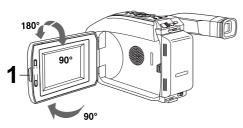

#### ■ Concerning the Memory Card

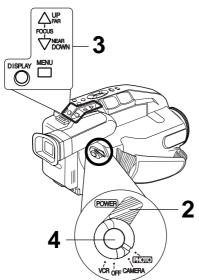

- Except for some special features, this card is compatible with other Panasonic brand products, like Digital Camera (DMC-LC5, DMC-F7).
- Panasonic only guarantees compatibility with Panasonic brand cards and those bearing the SanDisk logo.
- This Camcorder can capture a maximum of 697 still images because of camera memory capacity.
- In order to capture 697 images, a larger Memory Card (optional) with approx. 62 MB of memory is needed for FINE mode and approx. 21 MB is needed for Normal mode.

#### Cautions for the Memory Card: -

- While Memory Card data is being read, do not remove it, turn off the power, or subject unit to vibrations and shocks.
- Do not leave the Memory Card in a place with high temperature, exposed to direct sunlight, or where electromagnetic waves and static electricity can be generated.
- Electromagnetic waves, static electricity, malfunction of the Camcorder or of the Memory Card itself could erase the data recorded on it. To prevent the loss of picture data, we recommend that you make a backup copy on the computer.
- Do not bend or drop the Memory Card as this could damage it or the captured contents.
- Do not touch the connector on the rear edge of the Memory Card with your fingers, and take care that no dirt, dust or water enters it.
- Do not affix other labels to the Memory Card face or back as Card insertion/removal may become impossible.

#### Recording

#### Note:

- · Please note that the included 8 MB Memory Card already contains 12 pre-recorded titles for your use. Please see page 52 for further details.
- If Memory Card is not inserted, "NO CARD" appears on-screen. Set POWER to OFF, then insert the Memory Card
- If "CARD ERROR" appears on-screen, see page 56.
- Sound will not be recorded.
- The features below are not available while in PHOTO mode.
- Auto Fade
- Digital Fade
- Color Digital FilterDigital E.I.S.
- Digital ZoomStill/Strobe/Wide
- MotionSensor
- Digital Wipe Mode
- Picture in Picture Wipe Title

#### Before you begin...

- Connect Camcorder to power source.
- Insert the Memory Card (page 34).
- Press LCD-OPEN and swing LCD monitor fully open. Adjust viewing angle.
- Set POWER to PHOTO.
  - Be sure POWER is fully rotated to PHOTO position.

060 FINE PHOTO

- Press MENU for REC MODE menu. Press UP or DOWN to select NORMAL or FINE (page 48). Then, press **DISPLAY** to set.
- Press RECORD/PAUSE to capture image.
  - · As the image is processed, the status screens below appear.
    - The next image may be captured after "COMPLETED" disappears.
  - Depending on the image taken, the image page remaining indication may not change, or it may be decreased by 2 images.

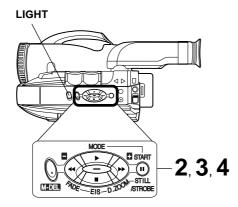

• For sharper images, set electronic shutter to higher speed when shooting in bright conditions, such as outdoors.

#### · WARNING: ·

Do not, under any circumstances, remove the card immediately after pressing the RECORD/PAUSE (during recording of an image) or while deleting. This could damage the format of the card and make it unusable.

#### Before you begin...

- Connect Camcorder to power source.
- Insert the Memory Card (page 34).
- Set POWER to PHOTO.

#### Note:

- If Memory Card is not inserted, "NO CARD" appears on-screen. Set Power to OFF, then insert the Memory Card.
- Pictures captured with other brand products cannot be used with this Camcorder.
- If "INCOMPATIBLE IMAGE" appears onscreen, the size of the captured image cannot be played back on this Camcorder.
- Do not change POWER setting to CAMERA or change recording mode while "PLEASE WAIT" is displayed.
  • If "CARD ERROR" appears on-screen,
- see page 56.

#### Using the Light

For capture of still images in dim lighting.

#### Set <u>LIGHT to AUTO</u>.

When **RECORD/PAUSE** is pressed to capture an image in dim lighting, the Light comes on for about 2 seconds, the image is captured, then the light goes out.

Or, set LIGHT to ON/OFF manually. (See page 16 for further details.)

#### Playback

- Press LCD-OPEN and swing LCD monitor fully open. Adjust viewing angle.
- Press ▶ (PLAY) to play mode. The Multi Image Playback screen appears. The last captured image

screen is underlined.

- If there are no recordings on the card, "NO PICTURE" appears on-screen.
- In NORMAL or FINE mode, the color of the Multi Image page number is as follows:

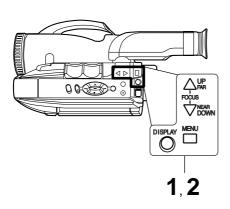

NORMAL mode → green FINE mode → white

- Press  $+ (FF) \rightarrow next.$ Press  $\overline{-(REW)} \rightarrow \text{previous}$ .
  - The selected image will be underlined in green.
  - Continue pressing + (FF) or (REW) for next or previous page.
- Press ► (PLAY) to display image. This screen appears followed by image.

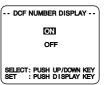

- Press DISPLAY to remove or redisplay this screen.
- Press (STOP) to redisplay Multi Image playback screen.

## Displayed Directory/Image Number

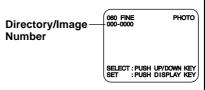

#### Before you begin...

- Connect Camcorder to power source.
- Insert the Memory Card (page 34).
- Set POWER to PHOTO.
- Repeat steps 1 and 2 on page 36 to display Multi Image Playback screen. Select any image and press ► (PLAY).
- Press MENU for DCF NUMBER
  DISPLAY menu.
  Press UP or DOWN to select ON or
  OFF. Then, press DISPLAY to set.

- ON → Directory/Image Number is displayed.
- OFF→ Directory/Image Number is not displayed.

#### Note:

- Directory/Image Number "xxx-xxxx" (x indicates the number) is assigned automatically.
- Even if ON is set, if the Directory/Image Number does not correspond with DCF it is not displayed.
- The Directory/Image Number becomes the folder and file name when viewed with card reader.
- This product is compliant with DCF (Design rule for Camera File System).
   Images saved on the Memory Card using other Digital Still Cameras that are compliant with DCF can be viewed on this product.

#### **Delete Specific Images**

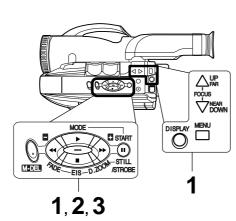

You can delete unwanted images and increase the remaining image memory.

#### Important:

Once deleted, images cannot be restored.

**DELETE PAGE:** Deleting Specific Image Pages.

**DELETE ALL**: Deleting All Image Pages. **FORMAT** : Format the Memory Card.

#### Note:

- · Pictures captured with other brand products cannot be used with this Camcorder.
- If "CARD ERROR" appears on-screen, see page 56.

#### ·WARNING: -

Do not, under any circumstances, remove the card immediately after pressing the RECORD/PAUSE (during recording of an image) or while deleting. This could damage the format of the card and make it unusable.

#### Before you begin...

- Connect Camcorder to power source.
  Insert the Memory Card (page 34).
  Set POWER to PHOTO.
- Press ► (PLAY) to play mode.

#### **Deleting Specific Image Pages**

- Press M-DEL for DELETE menu. Press UP or DOWN to select PAGE.
  - To exit menu at any time, press STOP.
- Press M-DEL for Multi Image screen. Press + (FF) or - (REW) to select image page.

  Press M-DEL to set.
- Press M-DEL to delete the page.
  - As image pages are deleted, page numbers adjust automatically.

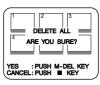

--- DELETE ---

#### **Deleting All Image Pages**

- Do step 1 above, and select ALL.
- **Press M-DEL** The screen right is displayed.

Press M-DEL to delete all pages. "NO PICTURE" appears on-screen after deletion.

#### **Format the Memory Card**

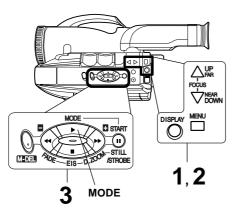

- Do step 1 above, and select FORMAT.
  - Press M-DEL The screen right is displayed.

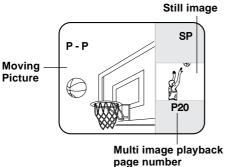

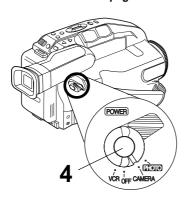

- Press M-DEL and all image data is deleted from the Memory Card. "NO PICTURE" appears on-screen after
- deletion.

#### **Picture in Picture Wipe Title**

Captured still images (page 35) can be recorded along with the current picture.

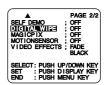

#### Before you begin...

- Connect Camcorder to power source.
- Insert the Memory Card (page 34).
- Set POWER to CAMERA.

#### (P-P = Picture in Picture)

Press MENU for MENU mode.
Press UP or DOWN to select DIGITAL WIPE.

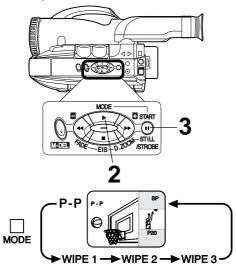

- Press <u>DISPLAY</u> to select ON. Press <u>MENU</u> to exit.
  - A still image captured on the Memory Card and the Multi image playback page number is displayed on the right side of the screen.
  - If there are no recordings on the card, "NO PICTURE" appears on-screen.
- Press <u>+ (FF)</u> or <u>- (REW)</u> to select still image to be used.
- 4 Start recording (page 17).
  - When recording starts, Multi image playback number disappears. Then the captured still images can be recorded along with the current picture.
  - To exit from the Picture in Picture Wipe title mode, press <u>MODE</u> (page 40).

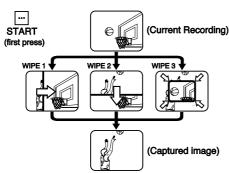

#### Note:

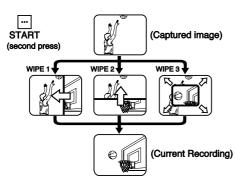

- If Memory Card is not inserted, "NO CARD" appears on-screen. Set Power to OFF, then insert the Memory Card.
- Pictures captured with other brand products cannot be used with this Camcorder.
- If "INCOMPATIBLE IMAGE" appears onscreen, the size of the captured image cannot be played back on this Camcorder.
- If "CARD ERROR" appears on-screen, see page 56.
- If Picture in Picture Wipe Title is selected, the following functions are not available: MotionSensor, Auto Fade, Digital Fade, Color Digital Filter, Digital Zoom, Digital E.I.S., Still/Strobe/Wide.

#### **Digital Wipe Mode**

Insert a captured still image into the current recording, or vice versa, in one of three wipe effects.

#### Before you begin...

- Connect Camcorder to power source.
- Insert the Memory Card (page 34).
- Set POWER to CAMERA.
- Repeat steps 1-3 on page 39 to set Picture in Picture Wipe title.
- Press MODE repeatedly for Wipe effect 1, 2, or 3 (See left).
  - WIPE 1 will flash for a while to store the image for the wipe.

## 3 Press START:

- **once** → inserts captured image.
- **twice** → inserts current recording picture.
- You can freeze the wipe in progress by pressing <u>START</u>. Press <u>START</u> again to resume wipe.

#### Note:

- If Memory Card is not inserted, "NO CARD" appears on-screen. Set Power to OFF, then insert the Memory Card.
- Pictures captured with other brand products cannot be used with this Camcorder.
- If "INCOMPATIBLE IMAGE" appears onscreen, the size of the captured image cannot be played back on this Camcorder.
- If "CARD ERROR" appears on-screen, see page 56
- If Digital Wipe mode is selected, the following functions are not available: MotionSensor, Auto Fade, Digital Fade, Color Digital Filter, Digital Zoom, Digital E.I.S., Still/Strobe/Wide.

#### **Digital PhotoShot Software**

A live or captured image can be transferred to your PC (Personal Computer).

#### Before you begin...

- Turn your PC off.
- Set Camcorder POWER to OFF.

### System Requirements for Digital PhotoShot

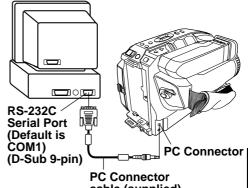

- IBM PC/AT or compatible.
- Intel® Pentium® Processor.
- Microsoft® Windows®95 or Windows®98 or Windows®Me or Windows®2000.
- . RAM: 16 MB or more.
- 2 MB of available hard-disk space.
- 256 color monitor (full color recommended).
- 3.5 inch 1.44 MB floppy disk drive (for installation).
  RS-232C serial port (D-Sub 9-pin).
  An adaptor (D-Sub 9-pin male to a D-Sub female) is required for a D-Sub 25-pin.
  Mouse or other pointing device.

### **PC-Camcorder Connection**

Connect Camcorder PC jack to the serial port on your PC (Personal Computer) using the supplied PC connector cable. Refer to PC or Windows manual to identify which COM port to be used for connection.

#### Note:

- Be sure to turn PC off before connection for proper image transfer.
- After Camcorder and PC are connected by starting up the software included, video recording is not possible.

cable (supplied)

#### **Software Installation** (Windows 95/98/Me/2000)

#### Before you begin...

- Your PC is in the power on mode.
- Turn on PC (Personal Computer) and start up Windows.
- Insert Digital PhotoShot disk (Windows 95/98/Me/2000) into a floppy disk drive.
- Click on Start, then "Run..."

Type in "a:\setup.exe" and click OK.

- If your 3.5 inch floppy disk drive is not "A", use appropriate letter.
- Follow instructions as they appear on PC screen until the installation is complete.
  - · Setup window will disappear when the installation is complete.

## **PC Connection**

#### Before you begin...

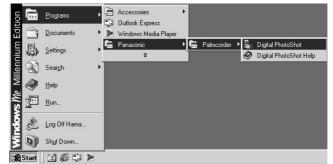

- Insert the Memory Card (page 34).
  Make Camcorder-PC connections (page 41).
- Turn your PC on.
- Set Camcorder POWER to PHOTO.

# Running the Software (Windows 95/98/Me/2000)

- Select Programs/ Panasonic/Palmcorder/ **Digital PhotoShot from** the Start menu.
- "Digital PhotoShot" is opened.

#### Note:

• COM Port and Baudrate are automatically selected.

Refer to Help for information about application operation and other Error messages.

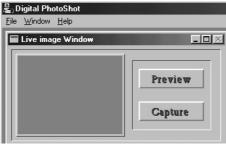

#### **Using Live Image Data**

You can capture the current Camcorder picture to your PC.

- Repeat steps 1 and 2 on above to run the Software.
- Click on "Window," then select "1 Live image Window."
- Click on "Preview," then Click on "Capture."
  - Repeat this step to decide on an image.
  - Captured image is transferred to your PC when you click on "Capture".
- Click on "Window," then select "Live photo Zoom In."
- Click on "File," then select "Save As."
  Captured image is stored to your PC.

• If, while transferring the image to your PC, the displayed picture appears abnormal, restart the PC application and turn Camcorder POWER off, and then back on.

For assistance, please call: 1-800-211-PANA(7262) or send e-mail to: consumerproducts@panasonic.com

## **PC Connection**

#### Before you begin...

- Insert the Memory Card (page 34).
  Make Camcorder-PC connections (page 41).
- Turn your PC on.
- Set Camcorder POWER to PHOTO.

#### **Using Memory Card Image Data**

Pictures captured with your Camcorder can be transferred to your PC.

Repeat steps 1 and 2 on page 42 to run the Software.

"Preview Window" screen appears.

Select the image data you want to transfer to your PC.

• The selected image will be underlined in green.

## 4 Click on:

#### **Transfer**

• The picture image is transferred to your PC and displayed.

#### **Delete**

• The picture image is deleted.

#### Save...

• The picture image is transferred to your PC and displayed. Save window appears.

## **Using PC Image Data**

You can use JPEG or Bitmap files from your PC for Picture in Picture Wipe Title and Digital Wipe by transferring them to the Camcorder using the Digital PhotoShot Software.

Repeat steps 1 and 2 on page 42 to run the Software.

Click on "Window," then select " 2 Preview Window."

Click on "File," then Click on "Open."

• At your PC, please select and open the data you want to transfer to the Camcorder.

#### Note:

 When transferring image data larger than VGA size (640x480) from the PC to the Camcorder, the perimeter of the image is cropped to VGA size.

Click on "File," then select "Data out to camera," then select Fine or Normal mode.

Your PC image data is transferred to the Camcorder.

#### Note:

• If, while transferring the image to your PC, the displayed picture appears abnormal, restart the PC application and turn Camcorder POWER off, and then back on.

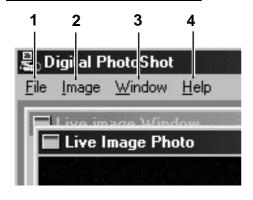

## **PC Connection**

#### **Driver Quick Reference**

#### 1 File

#### Open...

To open an existing image (Bitmap or JPEG).

#### Save As

To save the active image file under a new file name while preserving the original file.

## **Using a SD PCMCIA Adaptor (optional)**

If your PC has a PCMCIA type II slot, you can insert the Memory Card into a SD PCMCIA adaptor (optional, page 51) to transfer images, captured with this Camcorder only, to your

#### **Inserting a Memory Card**

#### Before you begin...

- Turn your PC on.Set Camcorder POWER to OFF.
- Remove the **Memory Card** from the Camcorder (page 34).
- Hold the **Memory Card** so that the arrow side faces up and points toward the SD PCMCIA Adaptor. Securely insert the card into the SD PCMCIA Adaptor slot as far as it will go.
- Hold the **SD PCMCIA Adaptor** so that the arrow side points toward the PCMCIA type II slot of your PC (Personal Computer). Securely insert the SD PCMCIA Adaptor as far as it will go.
  - Depending on the PC, it may be necessary to turn the SD PCMCIA Adaptor upside down in order to insert the card.
- To remove, push the eject button on your PC (may vary by machine) and pull the SD PCMCIA Adaptor out until it is no longer inserted in the PC (Personal Computer).
- Pull the **Memory Card** out of the **SD** PCMCIA Adaptor.

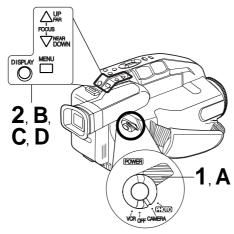

- Do not remove the SD PCMCIA Adaptor from the PC while the PC is working or while image data is being transferred between the Memory Card and the PC (including operation such as opening and storing images), this will cause irreversible damage to the memory.
- If you change file name or folder in the memory card, the images will be displayed properly on PHOTO mode.

  • If your PC does not have a PCMCIA type II
- slot but has a USB port, you can use the optional SD USB Reader/Writer (optional, see page 51).

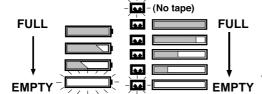

Please carefully read the Operating Instructions that come with the SD USB Reader/Writer before using.

## **Viewfinder/LCD Monitor Indications**

Tape remaining and battery charge level can be displayed.

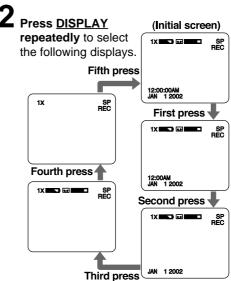

**Battery Remaining: Tape Remaining:** 

Before you begin...

• Connect Camcorder to power source.

Set POWER to CAMERA.

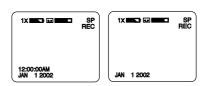

• Tape remaining indicator operates a few seconds after tape starts moving.

#### **Recording the Date and Time**

Do steps 1 and 2 above to select time/date, date only, or no display.

Start a recording (page 17).

• Only the Date and/or Time are recorded.

## **Display-Off Mode**

Set POWER to CAMERA or VCR.

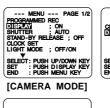

Press MENU for MENU mode.

Press UP or DOWN to select DISPLAY.

Press DISPLAY to select OFF. Press MENU to exit.

Press **DISPLAY** repeatedly to remove time/date.

Indications are restored the next time Camcorder is turned on.

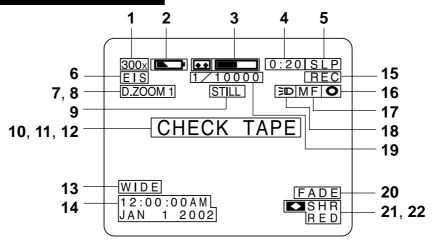

For assistance, please call: 1-800-211-PANA(7262) or send e-mail to: consumerproducts@panasonic.com

# For Your Information

## **Viewfinder/LCD Monitor Indications**

#### **CAMERA/VCR mode**

- 1 Zoom Magnification level (pages 23, 30).
- 2 Battery Remaining (page 46). "WARNING LOW BATTERY" appears and Camcorder shuts off after 15 seconds.
- 3 Tape Remaining (page 46).
  - "
    I flashes and "TAPE END"

    appears for 5 seconds when:
  - End of tape is reached.

## "flashes 1 minute and "CHECK TAPE" appears for 5 seconds when:

- RECORD/PAUSE is pressed with no cassette, or cassette has no record tab in Camera (RECORD) mode.
- PLAY, FF or REW is pressed with no cassette inserted in VCR mode.

#### 4 10-Second Reminder

Each time a recording is started, a 10 second incremental display (up to 59:50) lets you monitor how long one scene is recorded.

- 5 TAPE SPEED (pages 11, 17). (SP=standard play, SLP=super long play).
- 6 Digital E.I.S. (page 31).
- 7 Digital Zoom (page 30).

- 8 Digital Wipe (pages 39, 40).
- 9 Still/Strobe (page 32).

#### 10 VCR-MODE

"VCR-MODE" appears 1 minute when POWER is set to VCR or if <u>RECORD/PAUSE</u> is pressed in VCR mode.

#### 11 DEW

If moisture condensation occurs in unit, "WARNING DEW DETECTED" appears, and Camcorder will shut off in 15 seconds. Wait until "WARNING" no longer indicates when Camcorder is turned on to use.

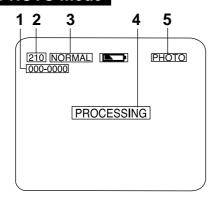

- 12 MotionSensor (page 33).
- **13 Wide Screen** (page 32).
- 14 Date and Time (pages 14, 15).

#### 15 Operating Mode

- REC (record)
- PAUSE
- FF (fast forward) PLAY
- REW (rewind)
- 16 Backlight (page 23).
- 17 Manual Focus (page 25).
- 18 Light ON/OFF/AUTO (page 16).
- 19 High Speed Shutter (page 26).
- **20** Fade (page 27).
- 21 Color Digital Fade (page 28).
- 22 Color Digital Filter (page 29).

## Viewfinder/LCD Monitor Indications

#### PHOTO mode

- 1 Directory/Image Number (page 37)
- 2 Image Page Remaining Indication (page 35)
  - Image pages left in selected mode. "000" flashes when memory is full.
  - · Memory capacity provided all pictures are taken in the same mode: "NORMAL" mode → Approx 210 images (Supplied 8 MB Memory Card) "FINE" mode →Approx 60 images (Supplied 8 MB Memory Card)

#### 3 REC MODE

- NORMAL or FINE mode.
- Image Size : "NORMAL" mode → 320 x 240 pixels.
  "FINE" mode → 640 x 480 pixels. "FINE" mode
- 4 Image Status Indication

Image status is displayed when captured.

#### PROCESSING:

Image is being processed. Note: Do not change setting to CAMERA or change recording mode while "PROCESSING" is displayed.

#### COMPLETED:

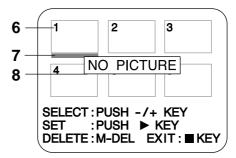

Image processing is completed. The next image may be captured when "COMPLETED" disappears.

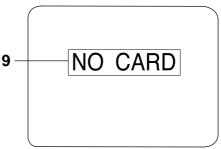

#### **PLEASE WAIT:**

Displayed when image is selected from Multi Image Playback screen. Note: Do not change POWER setting to CAMERA or change recording mode while "PLEASE WAIT" is displayed.

#### 5 Recording Mode

POWER is set to PHOTO.

- 6 Multi Image Playback page number.
- 7 Currently selected image is underlined in green or white. "NORMAL" mode → green "FINE" mode
- 8 Image Status Indication

No image is captured, all images are deleted from card.

#### 9 MEMORY CARD Indication

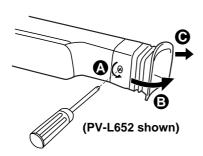

"CARD ERROR" appears.

When the Memory Card is not inserted in CAMERA or PHOTO mode, "NO CARD" appears. If the Memory Card is defective,

## **Operation Notes**

#### Cleaning EVF (Electronic Viewer Finder)

#### To Remove

- 1 A Remove the screw with a Phillips screwdriver.
  - Turn counterclockwise.

    B Turn the EVF Eyepiece.
  - Pull the EVF Eyepiece.
- Remove any lint or dust particles with a soft clean cloth being careful not to scratch the glass surfaces.
- Replace the EVF Eyepiece and the

#### ATTENTION

A nickel cadmium battery that is recyclable powers the product you have purchased. At the end of its useful life, under various state and local laws, it is illegal to dispose of this battery into your municipal waste stream. Please call 1-800-8-BATTERY for information on how to recycle this battery.

## **Replacing Clock Battery**

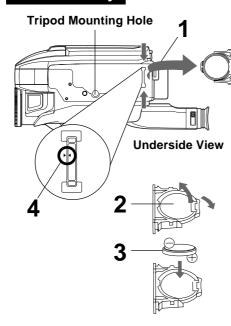

The clock battery is pre-installed. Follow the steps below if replacement becomes necessary.

#### - WARNING: -

Replace battery with Panasonic PART NO. VSBW0004 (CR2025) only. Use of another battery may present a risk of fire or explosion.

Caution: Battery may explode if mistreated. Dispose of used battery promptly. Keep away from children. Do not recharge, disassemble or dispose of in fire.

#### **Clock Battery**

- While pinching the 2 tabs, pull Battery Tray out.
- Bend middle tab out and remove Battery.
- Snap new Battery (@ mark down) into Battery Tray.
  - Do not reverse the polarity.
- Insert Battery Tray so the triangle marks meet.

- Keep Battery out of children's reach. Swallowing it may be harmful.
- Improper installation, discharge, or missing battery causes "CLOCK BATTERY" to appear when DISPLAY is
- Battery life is approximately 5 years.

## **Palmcorder Accessory System**

# Concerning the Memory Card (MultiMediaCard and SD Memory Card)

- Model PV-L452/PV-L652 can be used with either a MultiMediaCard or a SD Memory Card.
- Both of these exterior Memory Cards (MultiMediaCard and SD Memory Card) are lightweight and removable.
- Both Memory Cards (MultiMediaCard and SD Memory Card) are offered in a variety of memory sizes, so you can purchase a higher capacity Memory Card if desired.

#### **Pre-recorded Titles**

The supplied Memory Card is prerecorded with the following titles which can be inserted into a recording.

#### Warning

- Titles can be permanently erased from the Memory Card, e.g. formatting the card or using the delete all images feature (page 38).
- If a title is erased, the remaining title numbers will change.

Weight and dimensions shown are approximate.

Designs and specifications are subject to change without notice.

# **Before Requesting Service**

If a problem arises, you may be able to correct it yourself. See Symptom and Correction list below.

Symptom	Correction
No picture in EVF or LCD monitor	Connect Power Source. (pp. 9, 10) Set POWER to VCR or CAMERA. (pp. 17, 20) Check for Dew Indication. (p. 47) Use fully charged Battery. (p. 9) Firmly connect all needed cables. (p. 10)
The right side of the screen appears grayish	Be sure DIGITAL WIPE is set to ON. (p. 39)
Video cassette cannot be inserted	Connect Power Source. (pp. 9, 10)     Insert cassette, window side facing out. (p. 11)
Video cassette cannot be removed	Connect Power Source. (pp. 9, 10)
Operation buttons do not work	Check for Dew Indication. (p. 47)
Recording cannot be done	Make sure record tab is intact. (p. 11)     Check Battery Indicator. (p. 46)     Check for Dew Indication. (p. 47)
Auto Focus does not operate	Set FOCUS to AUTO. (p. 25)     Set POWER to CAMERA. (p. 17)
Sound from microphone can't be monitored	Set unit to REC or Record/Pause mode.
Camera picture is too dark	Set HIGH SPEED SHUTTER to AUTO. (p. 26)
No playback picture, or the playback picture is noisy or contains streaks	Press UP/DOWN button during playback (Tracking Control). (p.20)
"Panasonic ITS TAPES CAN PLAY IN YOUR VCR" appears in EVF or LCD Monitor	Set POWER to CAMERA, then set SELF DEMO :     OFF in MENU screen to cancel Demo mode. (p. 7)
"NO CARD" appears in EVF or LCD Monitor	Make sure Memory Card is inserted. (p. 34)
Cannot capture the image	Set POWER to PHOTO. (p. 35)     No memory remaining. Delete some images before capturing more images.
Cannot playback Still image	Set POWER to PHOTO. (p. 36)     Make sure Memory Card is inserted. (p. 34)
"NO PICTURE" appears in EVF or LCD Monitor	There are no images in memory.
Top of playback picture waves back and forth excessively	A playback signal is not as stable as an off the air TV signal, so the top of your TV screen may appear bent or unstable during playback. This is called, "Horizontal AFC time constant change." To correct, slowly turn the TV horizontal hold control. If your TV does not have this control, or adjusting it does not help, contact your TV service center. (Some nominal service charges may be required.)

# Video Head Cleaning

**Clogged Video Head** 

While head cleaning is normally not needed, playing old or damaged tapes may clog the heads. When playback picture resembles example at the left, head cleaning is required.

Ideally, head cleaning should be performed by a qualified service technician. When this is not possible, purchase a head cleaning cassette. Be sure to follow cleaning cassette instructions exactly and only use when symptoms occur.

# **Before Requesting Service**

# Self Diagnostic System

If any of the following numbers appear on-screen, the camcorder may have a problem. Do not remove the battery (if attached) and write down the displayed number on below. Then, take the camcorder to a service center for repair.

Error No.	Description	
U11	Card Error	
U12	Card Error	
U13	Card Error	
U14	Card/Camcorder Dialogue Error	
U15	No Card Memory	
U16	Captured image limit exceeded	
U17	Captured image limit exceeded	
U30	Error other than above	

# **Request for Service Notice**

Please photocopy this form when making a request for service notice.

Request	for	Sarvica	Notice:
Reduesi	101	Jei vice	NOUCE.

In the unlikely event this product needs service.

- Please include your proof of purchase. (Failure to due so will delay your repair.)
- To further speed your repair please provide an explanation of what is wrong with the unit and any symptom it is exhibiting.

Mail this completed form and your Proof of Purchase along with your unit to: Panasonic Services Company 1705 N. Randall Road Elgin, IL. 60123-7847 Attn: Camcorder Repair

Please write the displayed Self Diagnostic number here. (See above)

TV/HDR COMBINATION	ONE (1) YEAR, EXCEPT CRT CRT - TWO (2) YEARS	NINETY (90) DAYS CRT - NINETY (90) DAYS	In-Home or Carry-In	1-888-843-9788

Batteries (if included) - New rechargeable batteries in exchange for defective rechargeable batteries for ten (10) days. Non-rechargeable batteries are not warranted.

Tape (if included) - New video cassette tape in exchange for a defective video cassette tape for five (5) days.

Tape (if included) - New video cassette tape in exchange for a defective video cassette tape for five (5) days.

Memory cards (if included) - Exchange defective item for new one for ninety (90) days.

In-home, carry-in or mail-in service, as applicable, in the USA can be obtained during the warranty period by contacting a Panasonic Services Company (PASC) Factory Servicenter listed in the Servicenter Directory. Or call toll free contact number listed above, to locate an authorized PASC Servicenter. Carry-in or mail-in service in Puerto Rico can be obtained during the warranty period by calling the Panasonic Sales Company telephone number listed in the Servicenter Directory.

This warranty is extended only to the original purchaser. A purchase receipt or other proof of the date of the original purchase is requires before warranty service is rendered.

This warranty only covers failures due to defects in materials and workmanship, which occur during normal use and does not cover normal maintenance, including, but not limited to, video and audio head cleaning. The warranty does not cover damage which occurs in shipment, or failures which are caused by products not supplied by the warrantor, or failures which result from accident, misuse, abuse, neglect, mishandling, misapplication, alteration, modification, faulty installation, set-up adjustments, improper antenna, inadequate signal pickup, maladjustment of consumer controls, improper operation, power line surge, improper voltage supply, lightning damage, commercial use such as hotel, office, restaurant, or other business or rental use of the product, or service by anyone other than a PASC Factory Servicenter or a PASC authorized Servicenter, or damage that is attributable to acts of God damage that is attributable to acts of God.

damage that is attributable to acts of God.

LIMITS AND EXCLUSIONS

There are no express warranties except as listed above.

THE WARRANTOR SHALL NOT BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES
(INCLUDING, WITHOUT LIMITATION, DAMAGE TO RECORDING MEDIA) RESULTING FROM THE USE
OF THIS PRODUCTS, OR ARISING OUT OF ANY BREACH OF THE WARRANTY. ALL EXPRESS AND
IMPLIED WARRANTIES, INCLUDING THE WARRANTIES OF MERCHANTABILITY AND FITNESS FOR
PARTICULAR PURPOSE, ARE LIMITED TO THE APPLICABLE WARRANTY PERIOD SET FORTH ABOVE.
Some states do not allow the exclusion or limitation of incidental or consequential damages, or limitations
on how long an implied warranty lasts, so the above exclusions or limitations may not apply to you.
This warranty gives you specific legal rights and you may also have other rights, which vary, from state to
state. If a problem with this product develops during or after the warranty period, you may contact your dealer or
Servicenter. If the problem is not handled to your satisfaction, then write to the Consumer Affairs Department at
the Panasonic Consumer Electronics Company address above.

SERVICE CALLS WHICH DO NOT INVOLVE DEFECTIVE MATERIALS OR WORKMANSHIP AS

SERVICE CALLS WHICH DO NOT INVOLVE DEFECTIVE MATERIALS OR WORKMANSHIP AS DETERMINED BY THE WARRANTOR, IN ITS SOLE DISCRETION, ARE NOT COVERED. COSTS OF SUCH SERVICE CALLS ARE THE RESPONSIBILITY OF THE PURCHASER. warvid 02/12/2001

# For Your Information

# Spanish Quick Use Guide/Guía Para Uso Rápido

## Antes de comenzar...

• Inserte un casete con lengüeta para prevención del grabado.

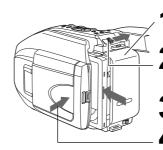

## Cargue la batería

Cargue completamente la batería antes de usarla.

Instale la batería. El indicador de carga (CHARGE) parpadea, luego queda encendido si ha terminado la carga. Desmonte la batería.

### Inserte el casete

Coloque <u>la batería</u> cargada.

Deslice <u>TAPE</u> <u>EJECT</u> para abrir la compuerta.

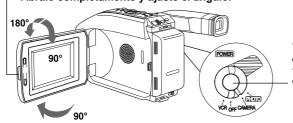

Inserte <u>el casete</u>.

Presione aquí para cerrar la compuerta.

## Grabación con la videocámara

Cuando el monitor LCD está completamente abierto, el visor se desconecta automáticamente (PV-L652).

Presione <u>LCD-OPEN</u> para abrir el monitor LCD. Abralo completamente y ajuste el ángulo.

Ajuste POWER a CAMERA.

Presione <u>RECORD/PAUSE</u> <u>para</u> <u>comenzar la</u> grabación.

Presione <u>RECORD/PAUSE</u> <u>otra</u> <u>vez para hacer una pausa</u> en la grabación.

## Reproduzca usando el monitor LCD

Cuando el monitor LCD está completamente abierto, el visor se desconecta automáticamente (PV-L652).

Presione <u>LCD-OPEN</u> para abrir el monitor LCD. Abralo completamente y ajuste el ángulo (vea arriba).

2 Ajuste <u>POWER a VCR</u>.

Presione <u>REWIND/SEARCH</u> para rebobinar la cinta.

 Presione <u>PLAY</u> para comenzar la reproducción.

Presione <u>STOP</u> para finalizar la reproducción.

# Reproduccion con efectos especiales

Para localizar rapidamente una escena especifica

Oprimir el botón de localización (SEARCH).

## Para congelar una imagen

- Oprimir el botón de pausa/imagen fija (PAUSE/STILL).
- Oprimir nuevamente el botón cuando se desea continuar reproduciendo.

Printed in Indonesia LSQT0529C S1101-2122 1. Important safety notice

Components identified by the sign  $\bigwedge$  have special characteristics important for safety. When replacing any of these components. Use only the specified parts.

2. Do not use the part number shown on this drawing for ordering.

The correct part number and part value is shown in the parts list, and may be slightly different or amended since this drawing was prepared.

3. Use only original replacement parts:

To maintain original function and reliability of repaired units, use only original replacement parts which are listed with their part numbers in the parts list section of the service manual.

- 4. Parts different in shape or size may be used. However, only interchangeable parts will be supplied as service replacement parts.
- 5. Test point information

○ : Test point with no test pin.

# **Schematic Diagram Notes**

Indication for Zener Voltage of Zener Diodes
 The Zener Voltage of Zener Diodes are indicated as such on Schematic Diagrams.

Example:

(6.2V).....Zener Voltage

2. How to identify Connectors

Each connector is labeled with a Connector No. and Pin No. Indicating what it is connected to,

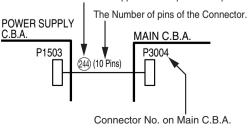

in other words, its counter part.

Use the interconnection schematic diagram to find the connection between associated connectors.

#### Example:

The connections between C.B.A.s are shown below.

Ref. No. of the connection parts such as lead cable, flexible cable which is supplied as a replacement parts.

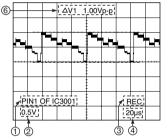

Parts marked "PT" are not used in any models included in this service model.

Example: 
$$\begin{vmatrix} \bar{C}6\bar{0}1\bar{1} & \frac{1}{2} \\ 100P & \frac{1}{2} \\ 100P & \frac{1}{2} \end{vmatrix} = \frac{PT}{2} + \frac{R6097}{2} \begin{vmatrix} R6097 \\ PT & \frac{1}{2} \end{vmatrix}$$

- 4. The part number shown on this drawing is only main part number, except for safety parts. Be sure to make your orders of replacement parts according to the parts list.
- 5. Jumper wires are used for WA10, WA5 etc and these are not supplied as replacement parts.

# **Signal Waveform Note**

How to read Signal Waveform

- (1) Connecting Point
- ② Volts/Div
